Resume objective

Detail-oriented Senior DevOps Engineer and Project Manager seeking to join the team at Franklin Manufacturing in San Diego. 15+ years of DevOps project management with designing, architecting, developing, deploying, testing, and automating integral deployments for multiple Fortune 500 companies. Exceeded company goals for manufacturing efficiencies by 23% YTD (2020), 27% YTD (2021), and currently 17% in 2022. Always engaging with stakeholders who channel constructive criticism into lesson learning opportunities.

Summary of Qualifications

Education: Bachelor of Science - Computer Science
University of California San Diego, San Diego, California, 2015
Systems Administration: Enterprise Linux, Fedora, Bash Shell, and RedHat
Cloud Infrastructure: AWS, Google Cloud Engineering, Auto Scaling, Amazon S3, and Route 53
Servers: MySQL, Apache, Cron System-Wide, HTTP Server, and .NET
Programming Languages: Python, JAVA, JavaScript, and Ruby

Professional Experience

DevOps Engineer Aug 2017

Schultz Performance, San Diego, California

- Led 12 IT professionals to deliver 25+ web and mobile applications for internal operations and consumer marketing.
- Partnered with five departments to develop cloud solutions for training, HR, inventory, production, sales and logistics.
- Delivered a two-year manufacturing automation project three months early, increasing efficiency by 45% YTD and reducing the budget by 23%.
- Maintained production schedules during COVID-19 while managing automation and raw material shortages (2020–2022).

DevOps Junior Engineer Sep 2015 - Jul 2017

Chips-R-Us, Anaheim, California

- Created a cloud-based inventory control platform for a microchip manufacturing company with $3 million in annual sales. Reduced final budget by 12% and finished the project 45-days early.
- Collaborated with a team of 8 computer software engineers to develop cross-channel applications for consumer education.
- Studied under the expertise of the company's Vice President of Technology, who provided valuable mentorship on DevOps project management, development, and deployment best practices.
