modeling services. The move strengthens the DeSimone global team's ability to offer integrated engineering services, fabrication intelligence, constructability, and digital project delivery from design through fabrication and construction.

The acquisition, made through the company's India subsidiary, DeSimone Consulting Engineering India Private Limited, amplifies DeSimone's industry-leading structural detailing and Fabrication Ready Modeling (FRM) capabilities while establishing a significant platform for the expansion of DeSimone's multidisciplinary engineering services in India. The merger supports DeSimone's strategy to fortify and broaden an array of curated services — FRM, and its turnkey steel design and procurement delivery system — to offer enhanced value and service to clients.

The acquisition of ESS adds nearly 200 employes to the DeSimone team, empowering the company to bring its broader multidisciplinary engineering offering firmly into the Indian market and positioning the company to respond robustly to the country's rapidly growing construction and infrastructure sectors and increased demand for sophisticated, integrated engineering solutions.

Noting the significance of the acquisition for the company and its clients, Stephen DeSimone, PE, chairman and CEO of DeSimone Consulting Engineering, said, "Establishing a strong presence in India represents a critical step in achieving DeSimone's long-term, global growth strategy. Further deepening DeSimone's modeling and detailing expertise with the addition of the ESS team strengthens our ability to deliver integrated solutions and multidisciplinary engineering services to clients around the world."

ESS co-founders Arif Qureshi, Akbar Khan, and Aasim Hodekar will continue their leadership roles, now as DeSimone principals based in India, contributing their experience and expertise to DeSimone's continued growth and expanding capabilities in the region.

Cleeman Realty Grp. closes 453,350 s/f Wegmans portfolio in Upstate NY

Co-founder and former CEO of ESS Detailing Services, Arif Qureshi, said, “We’ve collaborated with DeSimone’s structural detailing team as a trusted partner for many years, making our ability to work as one unified global team seamless going forward. Both ESS and DeSimone leadership share key objectives—global growth and the enhanced integration of structural engineering with Fabrication Ready Modeling. In joining forces, we bring together our teams, experience, and capabilities to deliver greater value to our clients while creating new opportunities for growth.”

Ewen Dobbie, DeSimone principal, said: “This is an important step in the evolution of DeSimone’s global Fabrication Ready Modeling and detailing business. ESS has been a trusted collaborator for many years, and we know their team, capabilities, and commitment to quality. Bringing the organizations together allows us to operate as one global team and further integrate engineering with fabrication-ready digital delivery. It gives us an excellent platform from which to build DeSimone’s broader multidisciplinary engineering presence in India. Our objective is not simply to add capacity, but to create a globally integrated capability that delivers even better project outcomes for our clients.”

DeSimone’s Fabrication Ready Modeling service involves an in-house collaboration between structural engineers and detailers who create fabrication-ready LOD 400 models during the structural design process. The firm has brought its integrated engineering and detailing services to such recent, high-profile projects as the new Bruce Springsteen Center for American Music in New Jersey, the award-winning One Times Square Redevelopment in midtown Manhattan, and the Hard Rock Hotel and Casino in New York City, among others.

ESS is ISO 9001:2015 certified, ensuring a Quality Management System across all services. Members of AISC, NISD, SEPC, MSME, and Start-up India (DPIIT), the company has earned a reputation for aligning with international standards and employing industry-best

practices to serve clients with consistency, integrity, and excellence.

COLUMNS AND THOUGHT LEADERSHIP

Premium experiences, proven returns: The New revenue playbook for sports venues - by Terry McIntyre

Investing in the Fan Experience as a Revenue Strategy The sports and entertainment venues that bet on premium experiences years ago are now seeing those investments pay off in packed seats, increased revenue, and industry recognition.

The façade is no longer just a finish. It's a risk strategy. - by Bentley Zhao

Twelve-billion-dollar weather disasters have already hit the U.S. through the first half of 2026, causing at least $31.9 billion in damage, according to **Climate Central**, the nonprofit that now maintains the disaster database NOAA discontinued.

We support green construction. Just not this kind - by Tammy Smith

Most people think of St. Patrick's Day as a fun footnote on the calendar. In construction logistics, however, it's a full-scale operational variable — especially if your work touches major metro areas with major parades and, let's call it what it is, enthusiastic celebrants.
