Multigrip Adjust

Description

The Multigrip Adjust is used for positioning on various structures or for securing oneself against a fall edge. The product can also be used as a temporary anchor point. It consists of a kernmantle rope with an end connection as a sewn loop or sewn-in carabiner, a rope adjuster for length adjustment, and a protective sleeve.

Specifications

- Version: 1. Multigrip Adjust with sewn loop and protective sleeve.
  2. Multigrip Adjust with attack carabiner and protective sleeve.
  Made from robust kernmantle rope 12 mm, cartridge red/black.
  Load-bearing rope end with rope end protection or attack carabiner.
