Portable Air  
Purification System

 delos™

# Ultrafine 468

## Portable Air Purification System

Patented “DFS” Technology delivers advanced air purification with a system specifically designed to capture and reduce ultrafine particles in the air. This revolutionary technology efficiently reduces airborne microorganisms and particulate matter while prolonging filter life by inhibiting the growth of captured microorganisms.

### SPECIFICATIONS

- Efficient purification for large spaces
- Color: Black, White

### UNIT DIMENSIONS

Height – 30”  
Width – 13.4”  
Depth – 10.6”

### WEIGHT

27lbs

### FEATURES

- Efficient air purification to remove VOCs and particles in the indoor environment
- Capable of 99.99% aggregate removal of particles down to 0.007 micron\*
- Incorporates patented DFS technology, currently utilized in hospitals, medical clean rooms, government buildings, and military applications

### TOTAL SYSTEM PERFORMANCE

- High quality EC motor for low operating costs.
- High CFM rate (300 CFM) with low energy consumption.
- High CFM rate per decibel level.
- Multiple fan speeds for maximum filtration and acoustical control.
- Lightweight, compact, portable construction.
- Designed for quick, easy filter maintenance and replacement.
- Sleek design that look great in any room.

Area (sq/ft)	Ceiling Ht (ft)	Air Exchange (hr)	Turbo Setting dB(a)	Low Setting dB(a)	CFM
1125	8	2	59.2	17.9	300
700	8	3	59.2	17.9	300
350	8	6	59.2	17.9	300

\*Individual particle sizes and specific particle size ranges may have different filtration efficiency rates.
