

ADOPT, TRANSFORM AND BUILD WITH AI

Understand how to drive productivity, smarter decision-making, and build confidence using AI in everyday work.

Level 3 - AI Enablement

Create a strong foundation for AI adoption by developing employees who can apply AI effectively, improve efficiency, and turn everyday productivity gains into organisational impact.

Level 4 - AI & Digital Transformation

Enable organisation-wide transformation by building capability to lead adoption, embed data-driven practices, and ensure new technologies and AI tools are used effectively across the business.

Level 4 - AI for Business Automation

Establish advanced capability to identify, design, and implement AI-enabled automation solutions that optimise processes and deliver measurable operational impact.

Become one of the **founding members** of the **Employer Network** and help define what comes next. Join from the very beginning, influence future priorities, and help shape a network designed to support and connect employers across the region.

We'll be hosting information sessions on three AI courses that can help your organisation boost productivity, improve decision-making, and unlock new opportunities for growth and innovation.

Plus, **all three** courses are **fully funded** through the **Enterprise Nation x Maikai partnership**, making it easier than ever to build AI skills across your workforce.
