LONDON

Distinctive support needs of cooperatives

As of 2025, there are 7,391 cooperatives in the UK, generating an [annual income of £42.7bn](#). The cooperative model can work for many businesses, spanning sectors from housing and farming to retail, media and energy.

That said, coops face a range of specific challenges:

- **Good governance:** An effective board is essential to maintain a thriving coop. Strong checks and balances are required to ensure processes and decision-making are aligned with purpose.
- **Accessing finance:** Just like any other business, finance is the lifeblood of a cooperative. Securing financing (grants, loans, credit) is crucial for stimulating growth.
- **Member engagement:** Keeping members engaged can be tough as your business grows. A robust membership strategy recruits, engages and retains members.

Whether you are an aspiring entrepreneur looking to set up a new cooperative, a business owner thinking of transitioning to a coop model or you already run one, discover all the support available to help you thrive and grow.

Support for new coops

Grow London Local

If the benefits of a cooperative model appeal and you think the model might work for your business, personalised guidance and expert support from Grow London Local can help you reach your goal.

You can also tap into the well of strategic and tailored support available from other authorities such as [Co-operatives UK](#). Business support services, training, resources and networking opportunities are all at your fingertips.
