BI Connect

BUSINESS INTELLIGENCE INTEGRATION MADE EASY WITH BI CONNECT™

Validation & Rules Built In

Secure, Global Ready

Open & Modern Integrations

Scalable, Flexible, Stable Platform

The Snap™ BI Connect™ solution seamlessly connects cloud and on-premise applications with other SAP, and non-SAP, cloud and on-premise apps to eliminate data silos and make digital access simple, secure and scalable.

▶ Regardless of 3rd party product, easily provide key transactional and operational data for fast and effective business intelligence gathering.

▶ Built with prepackaged integration content for common business intelligence systems to consume necessary data for complex data analytics.

▶ Helps your firm to sync data easily in a delta mechanism model so the transmission of data is minimized each time new records are created.

▶ Provides pre-built reference architectures, data models, packaged accelerators and deployment template.

▶ Includes annual releases to ensure continuous innovation and improvement.
