

Revolutionising AP Processing in Agriculture: RDO Equipment's Success Story

RDO Equipment, an expert in Agriculture Machinery, Truck and Car Dealerships throughout Australia with 29 Dealerships, is renowned for their commitment to innovation and customer service. RDO Equipment has been a pivotal player in supporting the nation's farmers and pioneering advancements in agricultural technology. As leaders in the sector, RDO has cultivated enduring partnerships with trusted suppliers, setting a high standard in the industry.

AP Automation

Integration

CDK ERP

The Challenge

RDO Equipment faced challenges in managing a dispersed workforce, inefficient processes, and the impending overhaul of their enterprise resource planning (ERP) system. With over 10,000 invoices processed monthly, the need for a centralised billing location became critical for transparency and streamlined operations.

The Solution

RDO Equipment partnered with Brisbane-based FileBound Solutions, recommended by a US-based equipment organisation. FileBound's comprehensive implementation strategy addressed the challenges efficiently. Working closely with RDO, FileBound streamlined business processes, integrated information with the ERP system, and eliminated the need to transfer invoices. The result was a tailored AP solution that met all requirements and was successful from day one Go-Live.

The Outcome

FileBound's solution provided instant access to supplier documents, removing unnecessary bottlenecks, and reducing the order to approval process by 90%. With improved insights into cash flow and seamless AP processing, RDO achieved annual savings of over \$80,000 and growing. The tailored solution eliminated missing and duplicate invoices, improving supplier relationships, and reducing customer service calls. FileBound's capabilities extended beyond AP, allowing access to warranty documentation and claims instantly across all dealership and service locations.

“Having a number of locations across rural Australia punctuated our need for a centralised billing location and better access insight into our cash flows.”

- Chief Commercial Officer, Jason Jones

The Benefits

- **Enhanced Efficiency:** Reduced the order to invoice approval process by 90%.
- **Cost Savings:** Achieved annual savings of over \$80,000 through reduced labor costs.
- **Supplier Relations:** Eliminated missing and duplicate invoices, resulting in happier suppliers.
- **Transparency:** Improved insights into cash flow and a clear view of any purchase in the business.
- **Seamless Integration:** Integrated seamlessly with ERP, ensuring a consistent and reliable process.
- **Flexibility:** FileBound's capabilities expanded to access warranty documentation, enhancing overall business processes.
