

KMV

Roof Fans

Features

- High performance
- All metal
- Motor mounted out of the air-stream
- Wind bands secured with clip fasteners for easy access
- Available in optional Colorbond™ colours
- Available in a Bushfire-rated variant

Appropriate for commercial kitchens

Complies with **AS/AS/ NZS1668.1:2015 for kitchen exhaust systems.**

Durability

KMV fans come with high-performance backward curved centrifugal impellers and are driven by TEFC or External Rotor (ERM) motors incorporating **sealed-for-life bearings.**

Can be Bushfire Rated

KMV fans can be modified to be rated for use in bushfire areas.

Flexibility

Class F motors are rated to 80°C ambient air temperature.

Class H motors are rated to 120°C ambient air temperature.

The KMV series is a range of high-performance all-metal fans for use in kitchen exhaust and general ventilation applications.

Motors are mounted out of the air stream and wind bands are secured with clip fasteners to allow easy access for servicing and cleaning.

Constructed from powder-coated galvanised steel in compliance with **AS/AS/ NZS1668.1:2015 for kitchen exhaust systems** and available in optional Colorbond™ colours.

KMV fans come with high-performance backward curved centrifugal impellers and are driven by TEFC or External Rotor (ERM) motors incorporating sealed-for-life bearings.
