

Topvex
Easy. Quick. Compact.

At Systemair we constantly strive to develop new solutions and products that offer a comfortable indoor climate in a cost-effective, sustainable way. Our time and cost saving solutions make life easier for consultants, installers, and building owners.

The Topvex floor standing range is a good example. It stems from Systemair's ambition to provide an integrated solution that is easy to configure to suit customer needs, while ensuring easy installation and fast delivery.

topvex

Exactly what you need!

EASY.

Selection, installation and intuitive control system

QUICK.

Wide range of standardised units with fast delivery

COMPACT.

Minimum space required with efficient performance

YOUR VENTILATION PROJECT STARTS HERE!

Topvex Floor Standing Range

The range comprises two types of Topvex air handling unit: Rotary and Counterflow, plus a special outdoor version.

High energy efficiency, space-saving design

Topvex AHUs offer high heat recovery, >80% dry air thanks to energy efficient EC fans. This in turn means low operating cost.

The units combine highest reliability with the smallest possible footprint. We selected the components to offer the performance we wanted, then optimized the size of the unit around them.

Easy selection with Systemair Configurator

Select, design and configure air handling units for your project with this user-friendly software.

Easy to transport

The standard unit has a small footprint and can fit through a standard door opening*. Larger units can be divided into sections to make installation even easier.

Easy to install

We set out to make installation really easy. The AHUs offer plug-and-play operation, with preconfigured integrated controls and easy start-up and commissioning using start-up wizard.

Easy to control with Systemair Access

Systemair Access is the brain of the AHU. It simplifies connection, configuration and control, offering intuitive menu navigation and a configuration wizard.

Cooling and heating with Systemair Fusion

Systemair Fusion solutions are smart fully integrated Topvex systems comprising air handling, cooling/heating and controls.

* Excl. SR 100

Check out our Configurator

You can easily choose the best Topvex configuration for your project.

The Systemair Configurator makes selecting, designing and configuring your air handling units easy. The user-friendly interface helps you choose the right Topvex unit quickly, simply by entering the operating parameter working points.

Based on your input, the Systemair Configurator will calculate all relevant, project-specific parameters to find and select the optimal Topvex configuration and the ideal accessories for the project.

Use your own design software with the Topvex plugin

Select and configure your Topvex AHU with just four simple commands, without leaving your CAD software! Our plugin for Topvex can be downloaded and used directly in Revit, AutoCAD and MagiCAD. It goes without saying that the plugin is free to use.

The screenshot shows the 'systemair' software interface for configuring a 'Topvex' unit. The interface includes a sidebar with navigation icons and a main configuration area. The configuration area is divided into several sections: 'Installation type' with dropdown menus for 'Installation type', 'Heat exchanger', 'Installation', and 'Heater type'; 'Air flow' and 'Pressure' input fields with values of 1,080 and 200 respectively; 'Heater options' including 'Calculation based on', 'Inlet fluid temperature' (60.0), 'Outlet fluid temperature' (30.0), and 'Outlet air temperature' (22.0); 'Options' with 'Impeller type' set to 'All'; and 'Efficiency requirements' with 'Min. Temperature efficiency (wet)' and 'SFPv limit' input fields. At the bottom, there is a table with columns for 'Name', 'SFPv [kW/(m³/s)]', and 'SFPe [kW/(m³/s)]'.

The Systemair Configurator at a glance

- Easily select, design and configure your air handling units
- Obtain BIM data through plugin for Revit, AutoCAD and MagiCAD
- Create and download all relevant documentation

Side

Side connected units are special designed for floor installation with optimised unit height, thus horizontal duct connections. All models have an insulated casing with integrated fans, filters, control system and heat exchanger. The model range has alternative re-heater variants and a various combination of accessories.

Rotary

The rotary heat exchanger has a high efficiency up to 85%-90% depending on operating conditions. It can recover moisture and is the heat exchanger that requires the least space.

Topvex SR

Compact unit with rotary heat exchanger in 5 sizes with airflow...

Topvex SR is a series of units with rotary heat recovery...

Topvex SR is equipped with efficient EC fans providing high performance and energy efficiency.

The unit is available with optional controlled airflow and advanced controls to facilitate commissioning. As several integrated possibilities for building management systems.

CONSULTANTS

We understand your challenges

Topvex offers high energy efficiency and space-saving designs. Our wide standard range in terms of airflow and size will enable you to meet your specifications for projects of many types. It also allows us to offer fast delivery.

- Product selection tool with plugins for Revit, AutoCAD and MagiCAD
- BIM models for Topvex units can easily be integrated into the customer design ensuring the accuracy and reliability of the drawings.
- With its minimum footprint, Topvex occupies less space in the building
- Indoor/outdoor flexibility: Choose outdoor installation to free up valuable indoor space without sacrificing performance
- Heater possibilities as standard, no need to find alternative suppliers

Rapid response

Tell us your requirements and we will give you the proposal you need – fast! Including project specific documentation, product data and price information. This saves you time when you create the project budget and project plan.

INSTALLERS

Get the job done faster with Topvex

Choose Topvex and you can plan your installation project quickly and smoothly. Our standardised range with item numbers enables you to identify and order the correct units easily. QR codes on the documentation give easy access to relevant information and spare parts.

- Topvex AHUs are easy to handle during transportation and installation; bigger units can be split
- Two variants (Left/Right) mean less work onsite, saves time when installing
- External connection box, fast, easy connection, commissioning and maintenance
- Plug-and-play installation
- Easy start up with configuration wizard

Our lead times for Topvex are short and, of course, we will always respond quickly to your technical questions.

BUILDING OWNERS AND MANAGERS

Topvex offers low overall operating costs

Whatever your building, Topvex AHUs will provide a high-quality indoor climate that contributes to the health and wellbeing of the occupants. Attractive, frameless designs and a small footprint allow you to optimise the use of valuable space in the building without compromising performance.

- Eurovent certified energy efficiency, heat recovery >80%
- Reliable operation, minimum maintenance
- Efficient filters, with filter monitoring that tells you when they need changing

OUR APPLICATION AREAS

Important features

Our attention to detail ensures safety and reliability.

Casing performance EN1886	Topvex new generation	Benefits
Thermal Bridging	TB2	Good resistance to condensation.
Thermal Transmittance	T2	Reduced energy consumption in summer and winter.
Leakage	L2	Leakage class with superior seal design.
Deflection	D2	Stability and leak resistance with rigid, deflection class D2 casing assembly and hinges.

T2 Example:

Typical impact on a 19 m² casing with average outdoor temperature of 6°C.
Improving Thermal Class from T3 -> T2 = Saving 500 kWh/year.

Higher energy efficiency

Increasing energy efficiency in our products is at the top of our list of priorities. We have made innovations within our Topvex units to meet growing market demands in relation to Specific Fan Power (SFP) values. These have been achieved without compromising performance, offering the same air volume and minimal footprint.

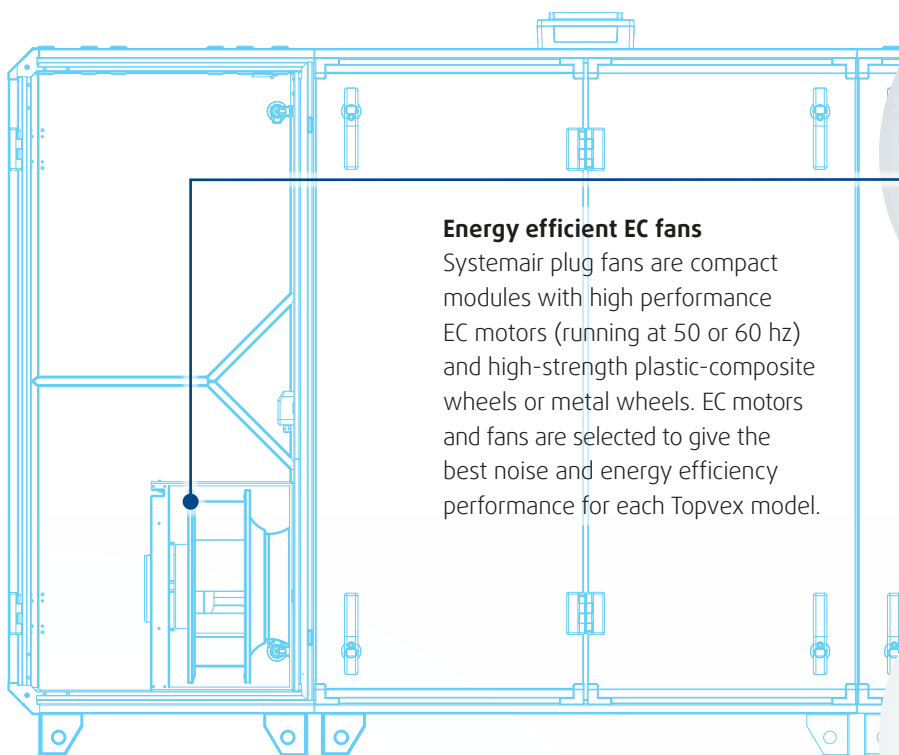

Energy efficiency through:

- Heat exchangers with low pressure drop and high heat recovery
- EC fans with high efficiency and low SFP values
- Casing EN1886

Certificates

- Machinery Directive 2006/42/EC
- Ecodesign Directive 1253/2014
- EMC Directive 2014/30/EU
- Low Voltage Directive 2014/35/EU

Energy efficient EC fans

Systemair plug fans are compact modules with high performance EC motors (running at 50 or 60 hz) and high-strength plastic-composite wheels or metal wheels. EC motors and fans are selected to give the best noise and energy efficiency performance for each Topvex model.

High-performance casing

Our panels are made from 50 mm insulation and have natural-finish colour magnesium-zinc (MgZn) plate with a corrosion class corresponding to C5 according BS EN ISO 12944-2 and BS EN ISO 9223.

The joint panel and plastic profiles, combined with latch, hinge, insulation and seal concepts, result in a high-performance unit.

Standard bag-type filter

Bag-type filters are standard, with ePM1 60% (F7) classification for supply filters and ePM10 60% (M5) classification for extraction filters. The built-in filter monitoring system constantly measures pressure drop of the filter to verify condition. Filter change due to clogging is indicated in time to ensure best filter performance, lifetime and cost efficiency.

Optional Deltri+ virucidal air filters

Virucidal air filters with efficiency Epm1 90%, capable of neutralising or destroying viruses – including SARS-CoV-2, as tested by the Luxembourg Institute of Science and Technology (LIST) and an independent laboratory. Proven efficiency with Eurovent Certified Performance A+ energy class rating.

A closer look at the Rotary range

Compact and energy efficient.

The Topvex range, featuring rotary heat exchangers with capacity well over 80%, ensures high efficiency while occupying minimum floorspace. The range offers you a wide range of options for configuring your air handling system.

Sizes 20, 25, 30 and 35 are all single case units, sizes 60, 70, 80 and 100* are split units. All units and sections can fit through a 900 mm opening except for the biggest Topvex unit, SR 100.

- Top-connected models, 7 sizes
- Side-connected models, 8 sizes
- Indoor and outdoor application*
- Airflow range: 360 up to more than 9,500 m³/h**
- High-end casing with C5 corrosion resistance according to ISO 1294
- Built-in Access Control system
- Constant air volume control (CAV) is standard
- Variable air volume control (VAV) is available as an accessory
- Wide range of accessories available including connectors, such as flanges, extension cables, cooling coils or extra filtration

* only available for side-connected model

** (0 Pa external pressure)

COOLING AND HEATING POSSIBILITIES

Check out our smart Fusion solutions

What Systemair Fusion solutions combine ventilation systems, with traditional cooling and heating systems into one optimised package, linked by smart communication. Bringing preconditioned air into the premises, they provide the high quality indoor climate you're looking for.

The Access control system in the AHU optimises the temperature in the refrigerant/chilled water system, keeping the running time of the compressor to a minimum. This ensures highest energy efficiency whenever the system is operating. **That's really smart!**

Rotary heat exchanger
 High performance, heat recovery capacity well over 80% (dry, EN308)

1 Rotor motor

The rotor motor incorporates EC technology for more efficient heat recovery.

Topvex units for outdoor application:

- 2** • Roof
- Easy connection (RJ45) for NaviPad Control panel
- 3** • Access Control Unit placed inside the unit
- Other accessories: louvres, protective hoods

Get to know our Counterflow range

Designed for flexibility.

The Topvex counterflow range comes in a variety of standard configurations. The unit can be combined with heaters, silencers, dampers, sectional defrosting and more accessories.

Sizes 20, 25, 30, and 35 are all single case units, and can pass through a 900 mm opening. Sizes 60 and 70 are split units that can be divided into three sections where the heat exchanger section can be disassembled and reassembled as needed.

- Top-connected models, 6 sizes
- Side-connected models, 6 sizes
- Indoor and outdoor application*
- Airflow range: 360 up to more than 6,800 m³/h**
- High-end casing with C5 corrosion resistance according to ISO 1294
- Built-in Access Control system
- Constant air volume control (CAV) is standard
- Variable air volume control (VAV) is available as an accessory

* only available for side-connected model

** (0 Pa external pressure)* only available

1 Heat exchanger and defrosting functions

Our top-quality, aluminium heat exchangers are 100% tested for air tightness. They are all designed with a full-flow bypass function. Choose between bypass defrosting or sectional defrosting.

2 Optimised dampers

Internal dampers used for heat exchanger bypass and sectional defrosting are an important detail. We aim to offer optimum function as well as a high seal class. Developing and testing our own damper design ensures we have the best know-how and cutting-edge experience.

Heater options

All our units offer a variety of standard electrical or water heater options. Our goal is to meet the requirements of any comfort zone. Choose from high/low coil or electrical power.

Systemair Access Control system

Simplifies connection, configuration and control.

Our user-friendly Access Control System is the common platform for all Topvex models. It features ModBus communication to all internal components which significantly simplifies the cabling and wiring inside the unit. The Access Control Cabinet, used for indoor applications, can be placed on the outside of the unit or away from the unit using an extension kit. This allows easy access for service, maintenance and connection of external accessories. For outdoor applications, the Access Control Unit is built-in inside the unit.

Designed by Systemair

Designed specifically for easy, quick and compact installation of Systemair air handling units.

User-friendly navigation

Intuitive, easy-to-navigate menus can be used on a variety of devices including NaviPad, control panels, smartphones or computers. Access to information can be set to three different user levels, depending on roles.

SYSTEMAIR
Access

Connectors for external components

All connectors for external components on the control unit are clearly marked and grouped together to reduce installation and startup time.

Systemair Connect

Gather all your air handling units in an easy-to-use cloud service for complete overview and accessibility.

Access benefits:

- Great user experience with intuitive menu navigation and configuration wizard
- External Access Control Cabinet with easy access to external connections
- Integrated support for BMS/SCADA using Modbus and BACnet communication
- Prepared for easy connection to Systemair Connect Cloud solution

Dedicated BMS connection

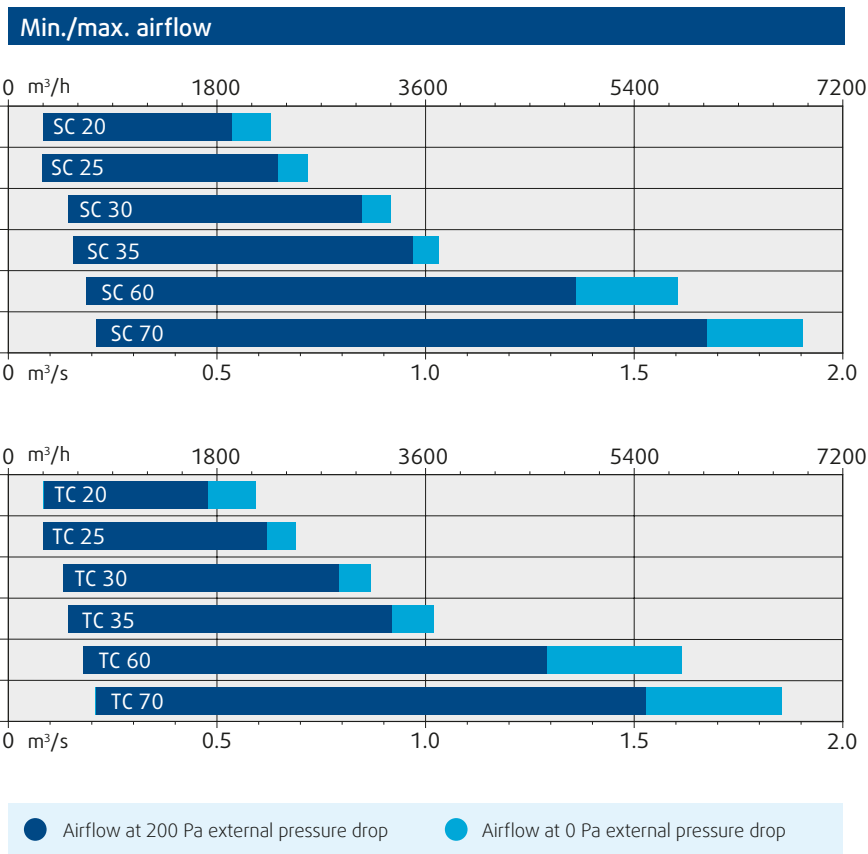

Provides simplified connection setup to BMS/SCADA using Modbus and BACnet communication.

Bus-based field devices

There are internal and external communication links for ModBus-based field devices. Wiring to all connected devices is simplified. All needed data and diagnostics are available in real time.
