

Air conditioning

Split systems - Residential and Light Commercial

Systemair Trust

We consider your trust in us as a supplier an important goal. It is always included in our work on all levels and in all areas whether it is a question of cooperation, quality, deliveries or documentation. This catalogue is of course a part of this work.

With this catalogue, which features products of air conditioning, we want to give you as a customer a general overview of what Systemair can offer within this field. More detailed information is available in our Online catalogue at www.systemair.com and as downloadable software. Systemair's range of fans, air distribution products and accessories also appears in our printed main catalogue.

Our product development leads the field - latest technologies in unit design, fans, motors, heat recovery, chillers, fan coils,... interact to give high efficiency and with that low power consumption. Systemair has grown each year since the start and we aim to continue with this trend.

Systemair strives to be a reliable supplier of quality products. We help our customers to focus on their own business. Reliable deliveries give the customers greater possibilities to quickly complete a job, and move on to the next project.

At Systemair we call this Trust.

Always
close to you!

Our commitment to quality

Systemair is certified in accordance with ISO 9001, ISO 14001, ATEX and European fire safety standard EN 12101-3. Our research and development laboratories are among the most modern in Europe. Our measurements are made in accordance with international standards such as AMCA and ISO.

Save energy and lower running costs!

Our "Green Ventilation" label highlights products that combine energy economy with energy efficiency, offering end users high energy-saving potential. The ErP symbol indicates that the product fulfills EU demands on energy consumption.

Systemair Group

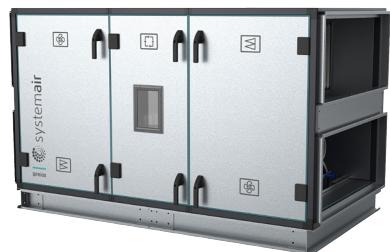

We have all what you need

Systemair has an extensive range of products: air handling units from large central units to small residential units with energy recovery, air conditioning products from air cooled or water cooled chillers/heat pumps to water terminal units, fans including smoke extractor, tunnel/car park fans and explosion proof fans, air distribution products and fire dampers. These products are installed in a large variety of locations, including offices, shops, industrial buildings, healthcare premises, tunnels, parking garages, training facilities, sport centres, homes etc.

Air handling units

Systemair produces a wide range of air handling units for several applications, from small office to large industrial building. The full range has been developed to satisfy strict needs of low energy consumption.

Our range of AHUs includes modular and compact air handling units, as well as a range of products specially designed for residential applications.

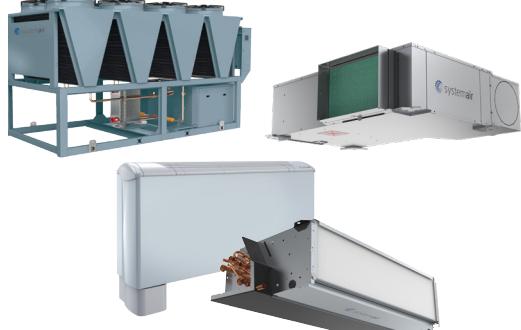

geniox

Air conditioning

Systemair's air conditioning products are suitable for a wide variety of applications such as offices, shopping centers, schools, hotels, public transports, residential buildings, industries and Data centres.

Our extensive range includes everything from air-cooled and water-cooled chillers and heat pumps to rooftop units, water source heat pumps, water terminals, close control units and vertical air conditioners.

Fans

Systemair has a wide range of fans that covers all your application areas, from small offices to large industrial applications.

Circular and rectangular duct fans, Roof fans, High temperature fans, Explosion-proof fans, Plastic fans, Axial fans, Smoke extraction fans & pressure differential systems, Car park jet fans & control systems.

Air distribution products

Systemair develops, produces and delivers air distribution products, diffusers and air flow control units. These components not only comply with the interior design requirements, but also make their own contribution to a pleasant indoor climate.

Diffusers, grilles and air flow control.

Fire safety products

Systemair fire and smoke control dampers are used to minimize the property damage and help with evacuation of occupants.

Smoke extract fans, Fire and smoke dampers.

Residential ventilation

Systemair's line of heat recovery ventilation units is ideal for homes, small offices and similar premises. They offer a high level of comfort both in terms of heating and clean air supply, along with significant energy savings.

Residential units and kitchen hoods.

Systemair product solutions are:

- Innovative and energy efficient 
- Simple to choose, install and maintain
- Robust, stable and standardized
- Performance tested, measured and documented in every detail.

SYSPLIT

SYSPLIT air conditioners Systemair: residential and light commercial split systems

The SYSPLIT air conditioner range are specifically designed for small to medium sized areas, offering the end user improved comfort and reducing drastically the power consumption.

The expanded range of SYSPLIT air conditioners is of superior performance and quality, providing more choice for customers.

Our innovative products offer the ideal solution when you need quiet and efficient room air conditioning to create a comfortable environment.

The latest generation of SYSPLIT air conditioners are among the most technically advanced and energy-efficient systems available today.

In addition to Single Split systems, Systemair also offers the SYSPLIT MULTI – an advanced range of inverter Heat Pump Multi Split Systems with up to 5 indoor units of different types that can be connected.

All new SYSPLIT inverter systems use the new R32 refrigerant that has a low global warming potential (GWP) and allows to achieve higher efficiency levels.

Ecodesign regulation

ErP Directive 2009/125

The new regulation have been adopted by the European Parliament to achieve the goals to reduce the power consumption in Europe related to air conditioning business and other home appliance as well as air-to-water heat pump, air handling, ventilation etc.

With its strategic plan called "20/20/20", Europe aims to reduce the CO₂ emissions by 20%, using 20% more renewable energy and consuming 20% less primary energy by 2020.

In order to facilitate the achievement of these objectives, EU issued the ErP Directive that specifies the eco-design

requirements for placing on the market the energy-using products.

For split air conditioners with power less than 12 kW, the minimum requirements are based on a new index of seasonal efficiency and on the sound power level as shown in the table below:

	A/C <6 kW		A/C 6-12 kW	
	SEER	SCOP	SEER	SCOP
SEER/SCOP min.	4,6	3,8	4,3	3,8
L _w indoor max.		60 dB(A)		65 dB(A)
L _w outdoor max.		65 dB(A)		70 dB(A)

20%
less emissions
of CO₂ gas

20%
more use
of renewable
energy

20%
less use of
primary energy

Measuring the performance in real conditions

The European Union requires the application of objective metrics for measuring performance in order to establish the minimum requirements and provide customers with information regarding the performance of air conditioning useful for their purchase.

The methodology used up to 2012 and based on the efficiency rating (EER) – presents a significant difference between the predicted and actual performance. For this reason a more accurate method has been designed: the seasonal efficiency ratio (SEER).

Among the most significant changes it includes the introduction of different operating temperatures for cooling and heating, the possibility of use of energy both at partial load and full load and power usage in standby and off mode.

Considering that most systems operate mostly in part-load conditions, the new methodology will allow to assess better the performance of a unit in real conditions.

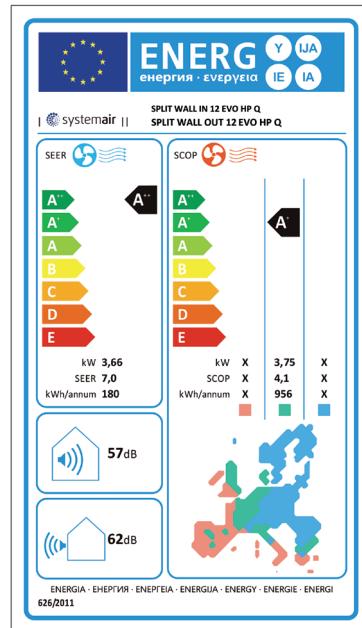

New energy classification

New energy classification in force from 1 January 2013

The transition to the concept of seasonal efficiency involves the development of a completely new energy label which shows the energy class based on the values of SEER and SCOP and the main characteristics of the product such as the sound power level of the indoor and outdoor units.

Energy efficiency in heating is presented with three different values according to the climate where the product is installed. For the manufacturer of the product is mandatory to indicate the values for the Temperate climate ("Average" heating value), those of the other two climates are optional. The data and energy efficiency classes are declared in accordance with EN14825.

The energy class shown in the new label, both in cooling and in heating, can not be compared to the energy class that had the old energy label as the latter was based on specific indices (EER and COP) and not on seasonal indices SEER and SCOP.

The energy efficiency classes for split air conditioners are shown in the table below:

Energy Efficiency Class	SEER	SCOP
A+++	SEER \geq 8,50	SCOP \geq 5,10
A++	6,10 \leq SEER < 8,50	4,60 \leq SCOP < 5,10
A+	5,60 \leq SEER < 6,10	4,00 \leq SCOP < 4,60
A	5,10 \leq SEER < 5,60	3,40 \leq SCOP < 4,00
B	4,60 \leq SEER < 5,10	3,10 \leq SCOP < 3,40
C	4,10 \leq SEER < 4,60	2,80 \leq SCOP < 3,10
D	3,60 \leq SEER < 4,10	2,50 \leq SCOP < 2,80
E	3,10 \leq SEER < 3,60	2,20 \leq SCOP < 2,50
F	2,60 \leq SEER < 3,10	1,90 \leq SCOP < 2,20
G	SEER < 2,60	SCOP < 1,90

Hi-wall Inverter High efficiency Split SYSPLIT WALL CUTE 09-24

Infrared remote control
SYS RM 57
(standard)

Wired controller
SYS WC 120G1
Art. no. 314841
(optional)

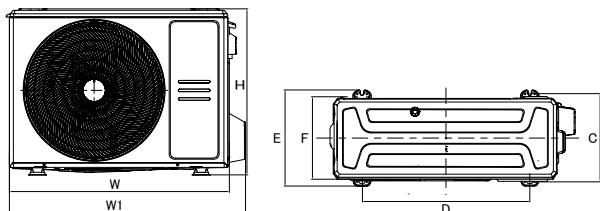

Features

SYSPLIT WALL CUTE encloses a unique design and a wide flexibility of use which goes from residential systems to multiple schemes in large buildings

- A+++ energy efficiency class in cooling for models 09 and 12
- Advanced DC inverter control for the compressor, outdoor fan motor and indoor fan motor.
- Cooling down to -15 °C and heating down to -20°C assures an operation all year round.
- Self-diagnosis function continuously monitors the operation of the air conditioner and protects the system.
- Refrigerant leakage detection can prevent the compressor being damaged by refrigerant leakage or compressor overload.
- With Turbo mode the unit will run with the ultra-high speed for 20 minutes, reaching more quickly the set-point temperature.
- The electric heating belt on the base plate of the outdoor unit avoids accumulation of rain, snow and defrosted water.
- The multifunction electronic board included provides a remote on/off contact, or can be connected to a centralized controller BMS gateway or to the wired controller SYS WC 120G1.
- Low GWP R32 refrigerant.
- The special antifreeze function in heating mode allows to keep a constant temperature of 8°C during absence periods of the user.
- The crankcase heater around the compressor assures safe start operation at very low outdoor temperature.
- Anticorrosive golden coating on the heat exchangers of outdoor units can withstand the salty air, rain and other corrosive elements. It also improves heat exchange efficiency.
- Infrared remote control SYS RM 57 included. Wired remote control SYS WC 120G1 available as accessory.

The sound pressure value of the outdoor units is measured in free field at a distance of 2 m. The sound pressure value of the indoor units is measured at 1 m from the front of the unit.

Hi-wall Inverter Split SYSPLIT WALL PRIME 09-24

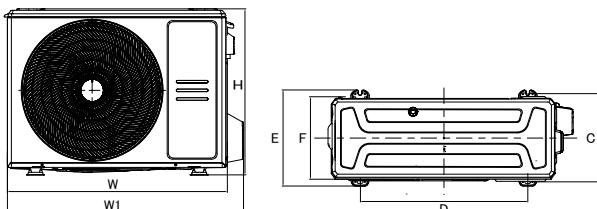

Features

SYSPLIT WALL PRIME are the most affordable and reliable solution for small offices and residential premises.

- High efficient DC inverter control provides accurate regulation of the room temperature.
- Stylish appearance with hidden display.
- Wifi module connection.
- Outdoor units are equipped with valve protection cover.
- Self-diagnosis function continuously monitors the operation of the air conditioner and protect the system.
- Refrigerant leakage detection can prevent the compressor being damaged by refrigerant leakage or compressor overload.
- The cold catalyst filter effectively decomposes volatile compounds and it has anti-bacteria effect. It is washable and maintains the effect for long time.
- With Turbo mode the unit will run with the ultra-high speed for 20 minutes to reach more quickly the set-point temperature.
- The special antifreeze function in heating mode allows to keep a constant temperature of 8°C during absence periods of the user.
- With the Auto-restart function the unit resumes with the same settings before the electric power failure.
- Low GWP R32 refrigerant.
- Anticorrosive golden coating on the heat exchangers of outdoor units can withstand the salty air, rain and other corrosive elements. It also improves heat exchange efficiency.
- Infrared remote control SYS RM 57 included.

Multi-split Inverter High efficiency

SYSPLIT MULTI 18-42 EVO HP

Features

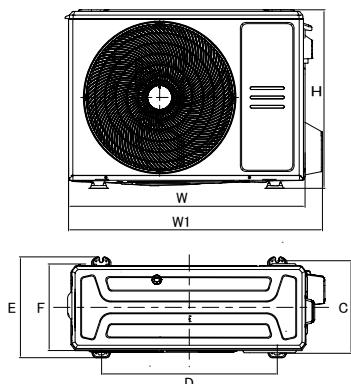

SYSPLIT MULTI EVO are ideal and flexible solution for providing quiet and efficient air conditioning for 2 to 5 areas from a single outdoor unit.

SYSPLIT MULTI outdoor units are compatible with SYSPLIT WALL, CASSETTE, DUCT and FLOOR/CEILING indoor units.

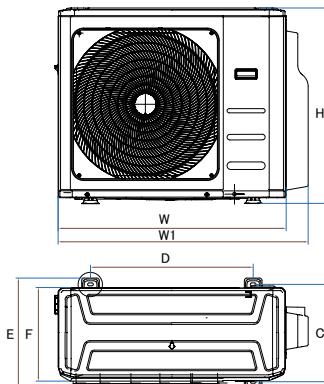

- DC inverter technology for precise temperature control and a low start-up current.
- Robust and reliable structure, cabinet made of zinc steel sheet.
- Outdoor units are equipped with valve protection cover.
- Rotary compressors assure high efficient operation, minimal vibration and low noise level.
- The electric heating belt fitted on the base plate of the outdoor unit avoid accumulation of rain, snow and defrosted water (only for models 18 and 27).
- Cooling down to -15 °C and heating down to -20°C assures an operation all year round.
- The crankcase heater wrapped around the compressor assures safe start at very low outdoor temperature (only for models 18 and 27).
- With the Auto-restart function the unit resumes with the same settings before the electric power failure.
- Low GWP R32 refrigerant.

Outdoor temperature	°C		-15 ... +50 cooling / heating -20 ... +24		

Rated performance at 100% of combination with SYSPLIT WALL PRIME 09 EVO HP Q.
For combination exceeding 100%, the cooling and heating capacities of each indoor units will be proportionally reduced.

Nominal conditions

	Indoor unit	Outdoor unit	Piping length	Level difference
Cooling mode	27°C DB, 19°C WB	35°C DB	5 m	0 m
Heating mode	20°C DB, 19°C WB	7°C DB, 6°C WB	5 m	0 m

Seasonal efficiency according to EN 14825.
The sound pressure value of the outdoor units is measured in free field at a distance of 2 m.

Features

SYSPLIT CASSETTE LNS air conditioners are ideal solution for creating a comfortable climate in the office and shopping centers – in all rooms designed with false ceilings.

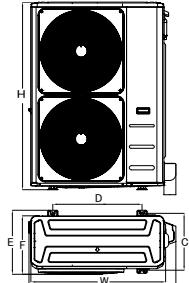

- Advanced DC inverter control for the compressor, outdoor fan motor and indoor fan motor.
- The 360° round flow panel assures an optimal air distribution and comfort in the room.
- Special aerodynamic shape of the fan and the geometry of the blades ensure low noise from the air conditioner.
- Washable air filter included in the panel greatly simplifies the maintenance.
- The panel is equipped with an interactive LCD.
- Built-in drain pump with lift height up to 750 mm.
- Fresh air intake can fulfill air quality requirements and enhance occupants comfort.
- Anticorrosive golden coating on the heat exchangers of outdoor units can withstand the salty air, rain and other corrosive elements. It also improves heat exchange efficiency.
- Auto-restart after electric power failure.
- The on/off and alarm contacts, as well as the network port for centralized and BMS gateway, allow a remote control of the split system.
- Precise Electronic Expansion Valve fitted in the outdoor unit secures an optimal operation in any ambient conditions.
- Low GWP R32 refrigerant.
- Infrared remote controller SYS RM 10 included; Wired remote SYS WC 120 or SYS CWC 30 available as accessory.

Nominal conditions

		Indoor unit	Outdoor unit	Piping length	Level difference
Cooling mode		27°C DB, 19°C WB	35°C DB	5 m	0 m
Heating mode		20°C DB, 19°C WB	7°C DB, 6°C WB	5 m	0 m

Seasonal efficiency according to EN 14825.

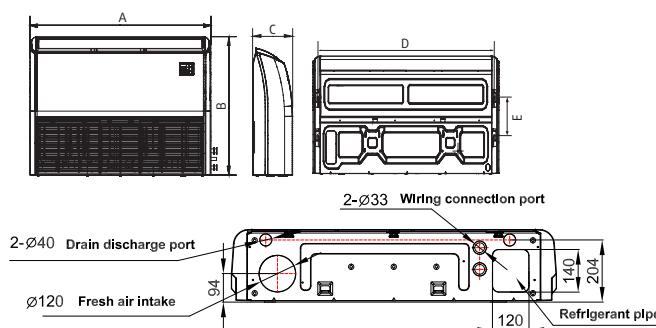

The sound pressure value of the outdoor units is measured in free field at a distance of 2 m. The sound pressure value of indoor units is measured at 1.4 m below the unit.

Features

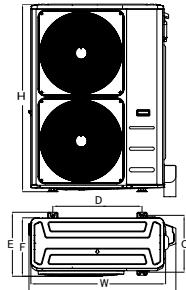

SYSPLIT CEILING LNS air conditioners are perfectly combined with any interior and are stylish with modern design.

- Advanced DC inverter control for the compressor, outdoor fan motor and indoor fan motor.
- Flexible installation, the unit can be installed hanged on the wall or ceiling suspended.
- Washable air filter included.
- Automatic distribution of the treated air in the vertical direction.
- Compact, easy to install and maintain, can be even installed in a corner.
- Low noise level thanks to the improved shape of the impeller blades.
- The fresh air intake can fulfill air quality requirements and enhance occupants comfort.
- Anticorrosive golden coating on the heat exchangers of outdoor units can withstand the salty air, rain and other corrosive elements. It also improves heat exchange efficiency.
- With the Auto-restart function the unit resume with the same settings before the electric power failure.
- Precise Electronic Expansion Valve fitted in the outdoor unit secures an optimal operation in any ambient conditions.
- Low GWP R32 refrigerant.
- Infrared remote controller SYS RM 10 included; Wired remote SYS WC 120 or SYS CWC 30 available as accessory.
- The on/off and alarm contacts, as well as the network port for centralized and BMS gateway, allow a remote control of the split system.

Nominal conditions

		Indoor unit	Outdoor unit	Piping length	Level difference
Cooling mode		27°C DB, 19°C WB	35°C DB	5 m	0 m
Heating mode		20°C DB, 19°C WB	7°C DB, 6°C WB	5 m	0 m

Seasonal efficiency according to EN 14825.

The sound pressure value of the outdoor units is measured in free field at a distance of 2 m. The sound pressure value of the indoor units is measured at 1 m below the unit and at 1 m from the air flow discharge (for horizontal installation).

Duct Inverter High efficiency Split SYSPLIT DUCT 12-60 LNS HP

R32

Wired controller
SYS WC 120G
(standard)

Infrared remote
control
SYS RM 10
Art. no. 323779
(optional)

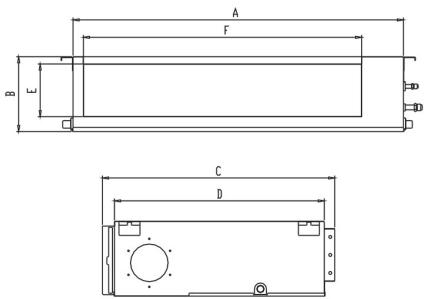

Features

SYSPLIT DUCT LNS air conditioners are designed using the latest engineering solutions and allow their installation with a minimum ceiling height.

- Advanced DC inverter control for the compressor, outdoor fan motor and indoor fan motor.
- One indoor unit can serve several facilities through a network of ducts to the high external static pressure that can reach up to 160Pa.
- Washable air filter included.
- Flexible air intake from the rear (included), it can be easily changed to bottom air intake using the same flange plate.
- Drain pump can lift the condensate water up to 750 mm.
- Anticorrosive golden coating on the heat exchangers of outdoor units can withstand the salty air, rain and other corrosive elements. It also improves heat exchange efficiency.
- With the Auto-restart function the unit resumes with the same settings before the electric power failure.
- Precise Electronic Expansion Valve fitted in the outdoor unit secures an optimal operation in any ambient conditions.
- Low GWP R32 refrigerant.
- Wired remote controller SYS WC 120G included; Infrared remote controller SYS RM 10 and Wired remote SYS WC 120 or SYS CWC 30 available as accessory.
- The on/off and alarm contacts, as well as the network port for centralized and BMS gateway, allow a remote control of the split system.

Nominal conditions

		Indoor unit	Outdoor unit	Piping length	Level difference
Cooling mode		27°C DB, 19°C WB	35°C DB	5 m	0 m
Heating mode		20°C DB, 19°C WB	7°C DB, 6°C WB	5 m	0 m

Seasonal efficiency according to EN 14825.

The sound pressure value of the outdoor units is measured in free field at a distance of 2 m. The sound pressure value of indoor units is measured at 1.5 m away from the center of the unit installed with 2 m duct on the supply air side and 1 m duct on the return air side.

Communication Kit

SPLIT-AHU Kit

SPLIT-AHU Kit 0-10V LNS
Art. no. 215221

Features

The communication kits allow the demand-oriented power requirement of the Systemair inverter outdoor units and thus always ensure the correct temperature in the summer and winter via the ventilation unit.

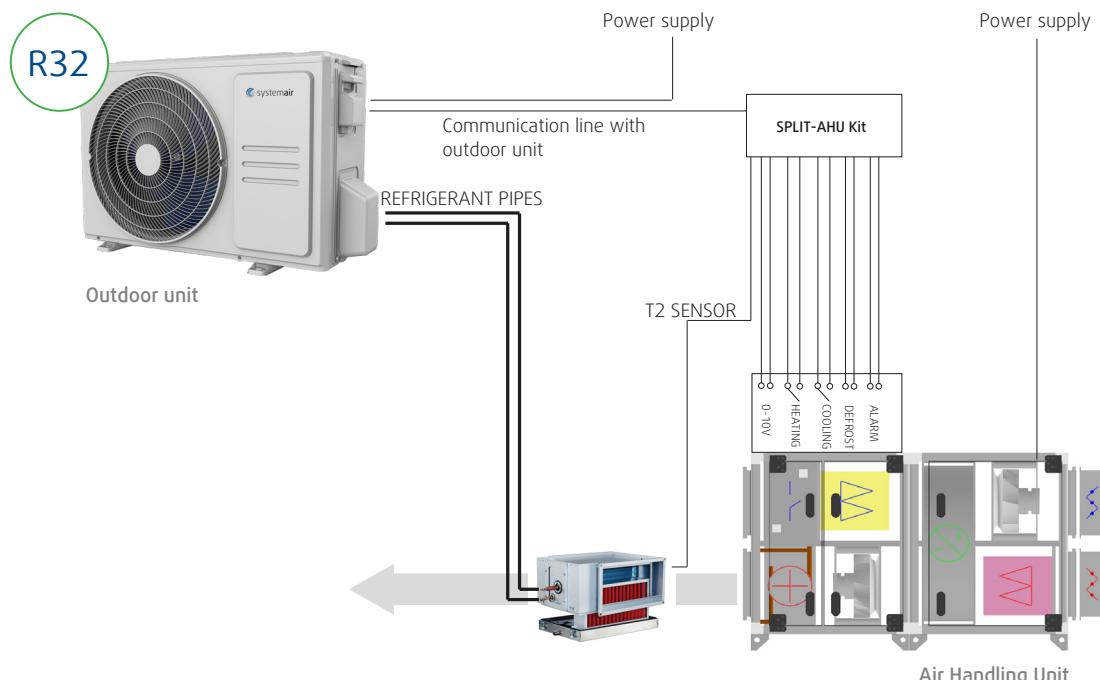

They give the possibility to control outdoor unit performance and operating mode cooling or heating of the on-site signals from a ventilation system or another communication controller.

The communication kits allow to control the power of the inverter outdoor unit between 0-100% by external 0-10V signal.

SPLIT-AHU KIT 0-10V LNS with external freeze protection probe for the DX coil. For Outdoor units with LNS communication line.

- Demand oriented capacity control by analog 0-10V signal
- LEDs on the board indicate the current operating mode
- A display shows the current capacity request
- No additional refrigeration components required as expansion valve
- Only one communication kit for capacity ranges from 2.6 kW up to 16 kW
- Digital inputs to switch operating modes
- Digital output for defrost and common alarm
- SPLIT-AHU Kit 0-10V LNS are also suitable with Multi Split Outdoor units

Wifi module
SYSPPLIT WIFI MODULE
Art. no. 315152

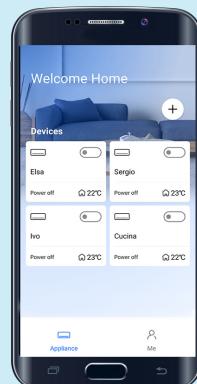

Wifi module
SYSPPLIT WIFI MODULE LCAC
Art. no. 317309

Control your units via App thanks to smart modules:

- SYSPPLIT WIFI MODULE (315152) directly installed into the panel board
- SYSPPLIT WIFI MODULE LCAC (317309) wall-mounted

Through the App, you can directly control several SYSPPLIT units under the same Wifi network using your smartphone.
