

Smart Disposables - SmartSyringe

SmartSyringe Amber multipack

Description

The SmartSyringe Amber is our multipack containing 25 sterile double-bagged luer-lock syringes with or without tip cap.

BD Plastipak™ amber syringes have the barrel colored to reduce U.V. light for administration of light sensitive medications. The light transmission has been characterized as per the transparency test (method 1) as described in the Japanese Pharmacopeia XVI. According to such method the light transmissibility (%) is characterized under a UV light source emitting at 450nm. The light transmission is $5.6 \pm 0.2\%$ (mean \pm standard deviation) according to the transparency test.

Material COMPONENT

Barrels

Plunger rods

Barrel cat# 309628

Stoppers

Lubricant

MATERIAL

POLYPROPYLENE

POLYPROPYLENE

POLYCARBONATE

LATEX FREE ELASTOMER

MEDICAL GRADE SILICONE OIL, <0.25 mg/cm²
