The roadmap to insuring a sustainable future

1. Starting with the four pillars: The insurance industry played a critical role in meeting the climate challenges of today, including the development of new products and services to support the transition to a low-carbon economy. For example, the Insurance Task Force (ITF) has collaborated with stakeholders to develop new insurance products that support clean energy projects.

2. A new era of power: The ITF is working with non-insurance stakeholders to develop new infrastructure assets. The members of the ITF have collaborated with partners to develop new infrastructure assets that support the transition to a low-carbon economy.

3. Supporting hard-to-abate sectors: The ITF is working with non-insurance stakeholders to develop new infrastructure assets. The members of the ITF have collaborated with partners to develop new infrastructure assets that support the transition to a low-carbon economy.

4. De-risking investments to enable growth across green projects: The ITF is working with non-insurance stakeholders to develop new infrastructure assets. The members of the ITF have collaborated with partners to develop new infrastructure assets that support the transition to a low-carbon economy.

5. Decarbonising, recycling and rebuild: The ITF is working with non-insurance stakeholders to develop new infrastructure assets. The members of the ITF have collaborated with partners to develop new infrastructure assets that support the transition to a low-carbon economy.
