

## Partner documentation

Power-to-X Congress Switzerland 2026  
“Reality Check with Net Zero”

Tuesday, 22 September 2026  
Kursaal Bern

Two established events are coming together to form a single congress: energie-cluster.ch and SPIN are jointly organising the **Power-to-X Congress Switzerland**. The congress brings together the expertise and strong networks of the previous events, **the Power-to-Gas Congress and SPIN Day**.

At the congress on **22 September 2026 at the Kursaal Bern**, the key Power-to-X technologies, their current status and their significance on the path to net zero will be discussed in the context of energy security, sector coupling, economic viability and decarbonisation. The congress will provide participating experts with a cutting-edge market overview, look beyond our borders to see how other countries are approaching the issue, and showcase exciting use cases from Switzerland and abroad. Discussions will cover successful approaches and examples, as well as the difficulties and hurdles that must be overcome on the path to net zero by 2050.

The event will be conducted in three languages, with simultaneous interpretation available in German, French or English.

As a partner, you will have the opportunity to raise your brand’s profile and position it within a relevant context. This document provides an overview of our PLATINUM, GOLD and SILVER partnership packages. Take this opportunity to raise your profile. We look forward to partnering with you!

### Partner PLATIN: CHF 10’000

- Your company chooses the topic of a workshop (including co-facilitation)
- Exhibition space in the break area, covering 20 m<sup>2</sup>
- 8 complimentary tickets to the conference, each worth CHF 520.00
