

Heimdal Sikkerhedspakke – Udvidet Installationsguide til Windows

Denne guide hjælper dig med at installere Heimdal Sikkerhedspakke på din Windows-computer.

Guiden indeholder både standardinstallation og ekstra trin til proxy/netværksopsætning.

Trin 1 – Download installationsfilen

Klik på Heimdal-versionen og download installationsfilen.

The screenshot shows the 'Download and Install' tab of the Heimdal web interface. The page is divided into two main sections. The left section contains instructions on how to download the latest version of the Heimdal Agent, with links for Windows (3.5.1 version), BMC (2.0.2 version), and Ubuntu (1.8 version). It also includes a note about the Microsoft .NET Framework 4.6.1 requirement and a link to download the Heimdal Agent Delivery Launcher. The right section contains a list of links for various documents and guides, including the License Agreement, Data Processing Agreement, Heimdal Documentation and Knowledge Base, Preinstall and Install settings, Dashboard setup, and Infoblox Management Guide.

Navigation tabs: About Heimdal, Your Heimdal Activation Key, Your Heimdal API Key, **Download and Install**, Central administration, Customer settings

Main content:

You can download the latest version of the Heimdal Agent at any moment using the link below:

- [Heimdal 3.5.1 version](#)
- [Heimdal BMC 2.0.2 version](#)
- [Heimdal Ubuntu 1.8 version](#)

Note: In order to install the Heimdal Agent please verify that you have Microsoft .NET Framework 4.6.1 installed with all the appropriate updates.

If Microsoft .NET Framework 4.6.1 is not installed on your computer, please [Click here](#) to download the Heimdal Agent Delivery Launcher. This kit will install the latest available Heimdal version, along with .NET framework.

The installer is always the same, no matter which software version you choose to install.

If you want to upgrade, just enter your activation key and the desired version will be deployed in your environment.

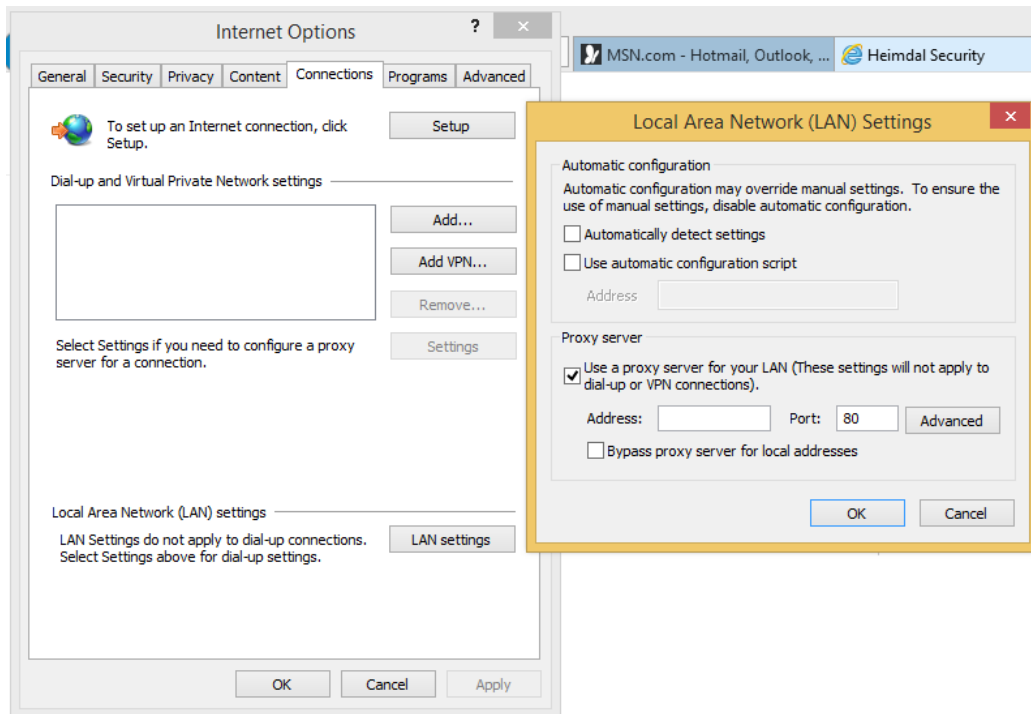

You can also choose to install the Heimdal Agent silently, without user intervention, by following these setup switches:

Links on the right:

- [License Agreement / Privacy Policy](#)
- a full guide that includes privacy policy and the terms of use included in this privacy policy.
- [Data Processing Agreement](#)
- Heimdal's standard data processing agreement.
- [Heimdal Documentation and Knowledge Base](#)
- full documentation of the the Heimdal suite.
- [Preinstall and Install settings](#)
- a quick 2-pages checklist that covers all the requirements you need to verify in order to use the Heimdal Agent to its full potential.
- [Dashboard setup](#)
- a small, accessible guide that will show you how to set up your Dashboard Account in no time.
- [Infoblox Management Guide](#)
- a walkthrough for our deployment tool, part of Vulnerability Management which lets customers deploy any software they need from

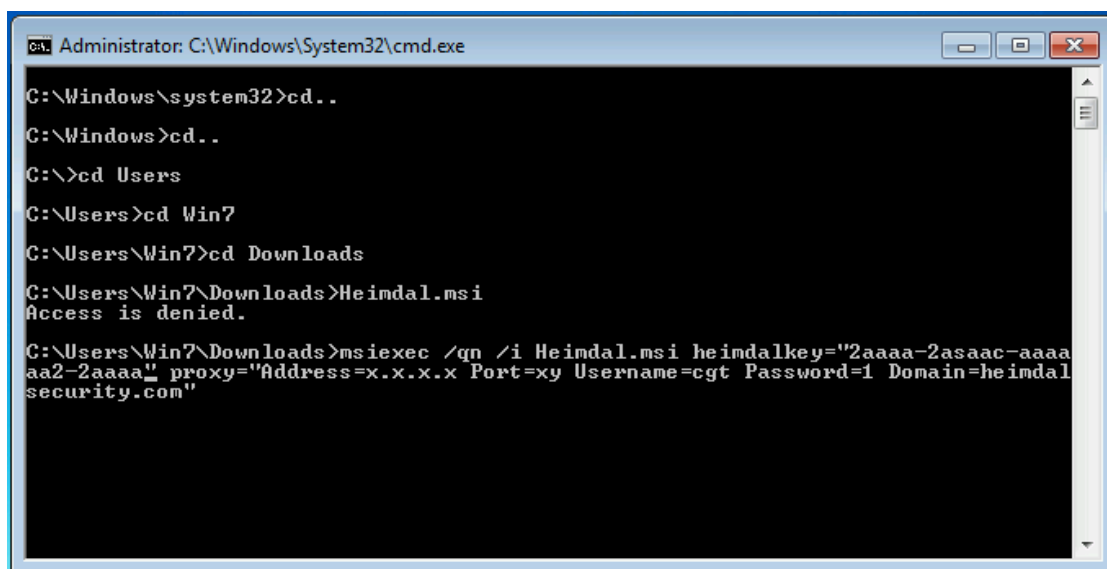

Trin 2 – Proxy-indstillinger (kun hvis nødvendigt)

Hvis din forbindelse bruger proxy, skal proxy-indstillingerne være korrekt opsat i Windows.

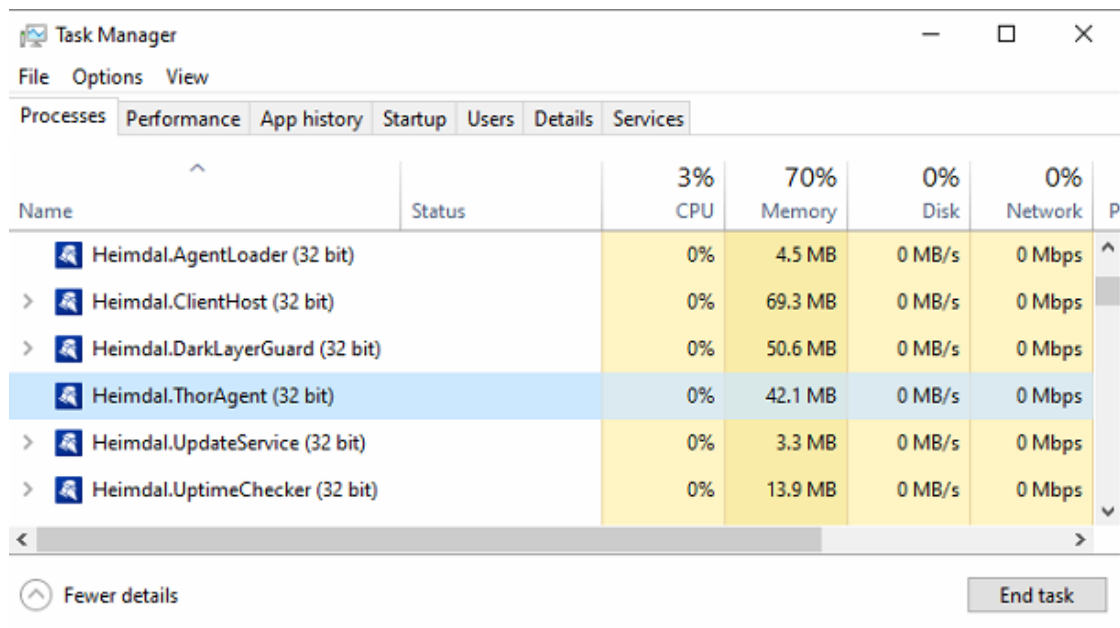

Trin 3 – Installation via kommandoprompt (proxy-miljøer)

I nogle netværk kan Heimdal installeres via kommandoprompt med proxy-oplysninger.

Trin 4 – Kontroller at Heimdal kører

Du kan kontrollere i Jobliste at Heimdal-tjenesterne kører korrekt.

Name	Status	3% CPU	70% Memory	0% Disk	0% Network	P
Heimdal.AgentLoader (32 bit)		0%	4.5 MB	0 MB/s	0 Mbps	^
> Heimdal.ClientHost (32 bit)		0%	69.3 MB	0 MB/s	0 Mbps	
> Heimdal.DarkLayerGuard (32 bit)		0%	50.6 MB	0 MB/s	0 Mbps	
Heimdal.ThorAgent (32 bit)		0%	42.1 MB	0 MB/s	0 Mbps	
> Heimdal.UpdateService (32 bit)		0%	3.3 MB	0 MB/s	0 Mbps	
> Heimdal.UptimeChecker (32 bit)		0%	13.9 MB	0 MB/s	0 Mbps	v
