

PC Plus Software

TimeMoto PC Plus Software

The complete and convenient solution

to manage your workforce and keep control over data internally.

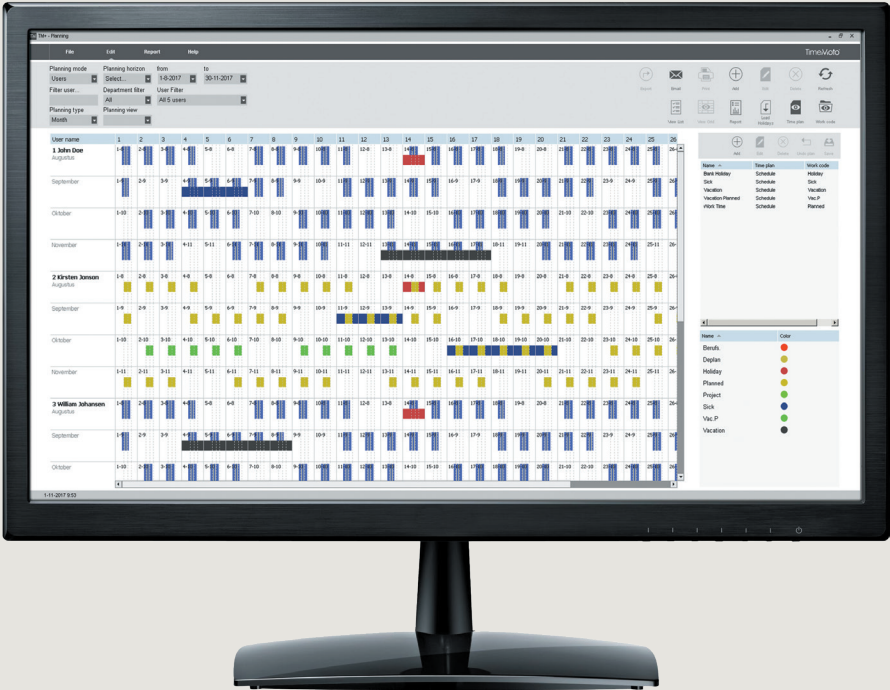

With a flexible combination of punching, scheduling, handling timesheets and reports. Choose your own servers.

The PC Plus Software is best suited for large companies that want to run TimeMoto on their own grid, disconnected from the internet. Keep control of your data with an in-house database.

The PC Plus Software includes all the real-time reporting, overview and management tools. Generate instant, up-to-date fire roll-call reports; create daily, weekly, monthly, and periodic reports per department and employee; track job costing, hours, overtime, and absences; design employee schedules; export your data to Excel, CSV, PDF, or your preferred payroll program—all with an unlimited database, automatic backups and support for multiple Time Clocks.

TimeMoto PC Plus Software

Runs on Windows 7, Windows 8, Windows 10
Compatible with all TimeMoto Time Clocks and Safes-
can TA-8000 Series
Local labor law compliant

Heighten visual clarity by assigning colors to projects, cost centers and employees. Use them with the PC Plus software intuitive drag-and-drop scheduling to easily plan work shifts and instantly compare scheduled hours to those actually worked.
