

# Family Art Activity

## Paper Helicopters

Here is a fun activity to make a paper helicopter to drop to the ground. You could experiment with different sizes to see what effect it has.

- Draw out your helicopter following the plan. The measurements do not have to be perfect but you need to keep the same shape
- Cut out your helicopter and cut down the line between A and B
- Fold A forward, then fold B backwards
- Fold up the bottom edge a couple of times and add a paper clip as a small weight

Now your helicopter is ready to drop. Hold it as high up as you can and drop it with the paper clip down. It should spin as it drops!

### You will need:

- Paper
- Pencil
- Ruler
- Scissors
- Paper clip

*If you don't have any paper clips, you could tape a small coin to the bottom to make a weight.*
