

Time and Attendance Software

Streamline people management

Employees are a vital and often the most expensive resource for most businesses. Tracking and understanding trends in employee's time and attendance is key to improving productivity and efficiency.

Our cloud-based time and attendance software powered by UKG automates your processes and significantly reduces the admin and associated errors. Streamlining everything from data capture, timecard management and cost tracking to simplify your employee time management. Coupled with powerful reporting tools it greatly enhances your management analysis while minimising overpayments and compliance risk.

Key Software Features:

- ✓ Labour costs tracking and management
- ✓ Leave eligibility, type, and duration tracking and management
- ✓ Scheduling based on availability, skills, and business demand
- ✓ Automated shift creation and assignment with manual scheduling options
- ✓ Accrued time off tracking and calculations
- ✓ Collect attestation data through existing data collection source
- ✓ Real-time reporting, analytics, and notifications
- ✓ Intuitive universal interface
