- Court-based calendar rules
- Process serving
- SignIT (digital signatures)

For details on additional services, please visit [infotrack.com](http://infotrack.com).

## INTEGRATION SUMMARY

# Reduce data entry and mistakes by eFiling from LEAP

InfoTrack's integration with LEAP saves law firms time and reduces the risk of errors in the court filing process by automating repetitive data entry.

InfoTrack can be activated for free inside your LEAP software. All filing transactions are logged, so you can easily pass 100% of the cost to your clients. Here are the top four reasons to use it.

## KEY BENEFITS

### File documents directly from your matter

No need to export or prep documents locally. Choose documents right from your matter with automatic PDF conversion, reducing the risk of a mix-up.

### Expenses automatically saved to LEAP

Every filing transaction is automatically recorded to the Operating Account tab. Track every expense, reconcile easily and get paid faster.

### Automated document management

File-stamped copies save back to your matter automatically. Add DocketSync to refresh any matter with the latest parties and case details.

### No subscription or setup fees

Only pay for what you use. With all fees tracked into your matter, you can directly pass the fees onto your client as an expense.

#### LEAP Legal Software

3 Second Street, Suite 501
