PAINTING

AFH is host to one of the largest collections of youth-created fine art. Our collection is bold, exciting, and reflective of the new vision of a culturally diverse Boston and beyond. We create works for exhibition, commissioned paintings for public spaces and private collections, interactive painting experiences and murals. An AFH mural can transform nondescript walls into architectural masterpieces and infuse corporate and community identities with powerful imagery. From realistic urban scenes to colorful, fun abstractions, our teen artists, guided by professional artist mentors, are capable of creating a variety of powerful commissioned images.

3D DESIGN

The 3D Design studio explores three-dimensional construction arts. Concepts are taken from sketch, to drawing, to model, to full execution. Team members use computer-aided drafting programs and conduct trials with materials to understand their properties and applicability to the project. Through demonstrations, innovation and experimentation, the team works with a variety of fine art and industrial tools and materials, with special focus on reclaimed materials. AFH's 3D Design studio has gained national attention for fabricating unique bike-racks, large-scale sculptures, architectural details, monument signage, eco-friendly furniture and more – infusing the zest and unpredictability inherent in young people “making things.”
