Integrated Workflow

Get a single source of truth and complete Clarity

Work smarter, not harder and use one system that fulfils every need right from first contact through to final payment.

Remove the risk of data duplication, inaccuracies, data loss and out of date software when you implement one holistic system and process across your business. Getting complete profit assurance has never been easier.

Quoting & Estimating

Never over or under quote again with Clarity Software.

Get complete profit assurance with the most powerful quoting and estimating software on the market.

Trusted by thousands of brands across the globe, the industry's most widely used system clears your quoting bottlenecks and can increase your quoting capacity by 100% or more with no extra staff.

Win the orders you've been missing out on, and turn away those that are not profitable.

Quote quickly and accurately for jobs of any size. Streamline the quoting and communication process when you send quotes out by email in a couple of clicks and generate internal works orders on confirmation. Repeating or looking up old quotes has never been easier, and happens with the blink of an eye.

Works Orders and easy order processing

Streamlined order processing makes jobs easier, more organised and less stressful.

Works orders in Clarity are your secure transition from order confirmation to manufacture. They act as a production job card with a unique quote revision reference, giving you full traceability back to the original quote.

This makes sure jobs are delivered to the exact customer requirements with complete transparency. Delivering excellent customer service and winning repeat business has never been easier.

Production workflow

Eradicate the risk of unexpected losses, delayed or forgotten orders and poor customer experience with Clarity's Production Workflow.

Scheduling every component of every job is simple, taking into account the capacity and next available run time of resources.
Track your jobs through every stage and function including artwork, printing, cutting, laminating, welding, stitching and bespoke finishing, with ease.

Focus on getting the next job over the line and get a clear overview of job status and progress via a live Gantt chart with traffic light indicators, fed by data collected from shop floor staff directly from their workstation. Exceed expectations every single time.

Stock management

Unify your warehouse and practice clever stock management. No more overflowing racks, old, holding or missed stock. Say goodbye to wastage and costly errors, and get control of off cuts and partial roll use to minimise stock on hand. Create pre-allocation of stock to jobs to ensure material requirements are built to each job.

Optimised stock holding has huge cash benefits. Don't fall short of fast moving or quick demand items. Don't hold too much. Keep cash in the bank, not on the shelves.

Proof of Delivery

Deliver excellence and get paid faster.

Proof of delivery from the field guarantees payment for jobs, using photo and signature evidence on your invoices. Manage fitting and delivery schedules electronically from start to finish. Synchronise all data back to the office from the field, reducing travel expenses and speeding up invoicing times. Get Clarity on site jobs, and track it all from the office.

Digital **Invoicing**

Invoicing made simple.

Generate clean, up to date invoices that are easily tracked. Create partial or full invoices or credit notes. Manage repeat invoices from our unique 'recurring' templates. Search for historic invoices easily and create batch and recurring invoices using simple processes.

But best of all, Clarity integrates with Sage and QuickBooks software, saving hours in duplication of data entry.

Management **reports**

Holistic business information drives better decision-making, increasing growth and profitability.

Get access to over 200 standard reports and unlimited customised reports and get complete visibility and clarity on your business.

Use date filters, sequence ordering, process triggers and more, plus brand reports to meet preferred layouts.

Get clarity on true job costs. Identify best sellers and optimise live stock levels.

Use this new found power to expand into new markets and bring Clarity to your business.
