

Powerful cost **calculators** for sign making jobs

Never over or underestimate for a job again

Empower your team to quote accurately and get complete profit assurance every single time. Simplify the costing process for even the most complex costing jobs, with the knowledge that you've got your margins spot on. When everyone costs from the same prices, quoting and estimating becomes consistent, and mistakes are reduced.

Set yourself against your competitors, when you combine your team's specialist knowledge with our tailored cost calculators. Watch your output increase as your employees take more responsibility. Welcome the cost savings as errors are eradicated. See sales figures grow as you win more sign jobs at top margin. And confidently turn away the bad ones that hit your bottom line. Give your team the tools they need to excel, and take your business to the next level.

Have all the **information** you need at your **fingertips**

Think of the list to consider when costing a sign job.

Artwork. Size. Quantity. Substrate. Posts and brackets. Cutting. Fabricating. Coating. Illumination. Assembly. Packaging. Delivery.

Correctly estimating an opportunity requires precision and accuracy throughout the entire job, not just one process. And each process contains variables which are all dependent on the individual requirements of the job. However, this can be simplified using Clarity Software's preconfigured templates.

Complex **quotes** in a flash

Build a library of your jobs and save them for future reference. Set all your preferred substrates, materials and labour rates as standard. Ensure the right machines are being used with optimised job nesting.

Anticipate your wastage and factor it in. With a margin. And link it to your Bill of Materials and Bill of Labour ready for order processing.

All you need to do is change the quantity and size; you'll get accurate costs and job processes in seconds. And it's summarised clearly, giving you the option to adjust any margins or add any extra processes under strict permission control.

No more worrying if you've forgotten something.

CLARITY
SOFTWARE

This is super-charged estimating for sign making. And it's the most powerful quoting and estimating software on the market.

Diversify and **win** more

Built-up letters. Fascia and folded panels. Vinyl lettering. Lightboxes and POS. Totems and wayfinding. Cut jobs.

Being able to offer a variety of sign and display options from one house wins more business. You become more valuable. More sought after.

Customers require clarity and flexibility in their signage to stay fresh, so you need to give it to them.

Clarity's cost calculators make estimating fast and simple for all bespoke and catalogue item jobs, so you can expand your portfolio and beat the competition.

Accelerate sales. And leave your competitors behind.
