

Unify and **streamline** the **delivery** process from start to **finish**

Achieve seamless integration between the outside world and the office

Manage your delivery schedule with ease, increase job accuracy and optimise your profit margins from start to finish with Clarity Software's delivery module.

Compatible with mobile, desktop and tablet, your team can work on the go and have complete clarity on which third party contractors are right for the job. Get a single source of truth on all open jobs with real-time status updates, making it easy for quick referencing.

Track the job. See the **progress**. Invoice with **POD**.

Get complete transparency and assurance on every job

Reference numbers driven by the Job Reference in Clarity are attached to each job that you push to your onsite teams. Images and signatures taken on site are sent directly to Clarity giving complete traceability of the job history as soon as it's signed off by the customer.

Payment for the job is accelerated when you send your printed invoice including the Proof of Delivery images, so there is no question that the work was completed. Deliveries is the final piece of your business workflow, removing the need for paper-based admin and improving your customer service.
