

Assemble the parts together using the hex key (supplied), starting with the front part and as shown in the diagram.

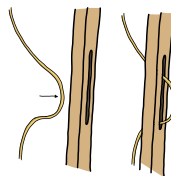

Draw or print a design of your choice on a A3 sheet (plain paper) to highlight it. Simply slide your work between the two diffusers (opaque diffuser at the back) before mounting it on the lamp.

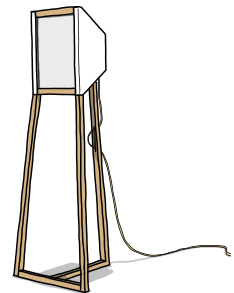

Insert the socket in the hole at the back of the lampshade, secure it using the clamping ring.

Slide the diffusers into the grooves of the frame. Now slide the shade onto the frame until it rests on the stopper at the back.

Use the hole on the back of the lamp to freeze the cable in a nice curve.

Easink is ready. Let there be light!

*Electrical installations and repairs must be carried out by a specialist. Before installing the lamp, turn off the electricity. The power specifications must not be exceeded (max. 40W). Only use low heat LED bulbs. This lamp is designed for indoor use only. It is not suitable for use in damp rooms or on wet surfaces. If you have any doubts or questions, contact a specialist.

If the external flexible cable of this luminaire is damaged, it shall be exclusively replaced by the manufacturer or his service agent or a similar qualified person in order to avoid hazards.

dimensions (mm)
