

Q1 2022

Fortnox AB (publ)

April 28, 2022

Today's agenda

- Q1 and 2022 in numbers
- Customers and market
- In focus right now

Tommy Eklund
CEO, Fortnox

A hand is pointing at a financial chart on a tablet screen. The chart displays a candlestick pattern with several lines in red, green, and blue. The background is a blurred view of a laptop screen with various financial data and charts. The overall lighting is blue and green, creating a high-tech, digital atmosphere.

Products in focus

Product Highlights in Q1 2022

Easy access – better business decisions

Fortnox Läs enables simplified sharing of information in Fortnox without being an administrator. A great way of offering transparency and insights to investors and decision makers

Fortnox Revisor is a similar product giving time limited access for accounting agencies and consultants.

New feature in invoicing

New functionality makes it possible to bookkeep an invoice as it's being sent. This new procedure will keep your real time accounting up to date, insuring better insights – always.

Digital submission of Annual reports K2

A new addition to Bokslut & Skatt enables digital submission of small company annual reports (K2). A very welcome improvement for all accounting firms.

Plus 18 more improvements and new features across the product range...

Example of Product improvements in Q1

Bank account balance available directly in the Fortnox lobby (bank integration needed)

Create a stronger and more attractive company profile in Offerta

Payroll Mini now available also as desktop version

Send an invoice and bookkeep simultaneously. Keeps real time accounting always updated

Improved view for management of partner apps in "App market"

Fortnox Läs enables simplified sharing of information in Fortnox without being an administrator

Fortnox Revisor enables time limited access for accountants

Digital submission of small company annual reports (K2) in Bokslut & Skatt

...and many more
