

Update: Report Q3 2025

2025-11-18

Precise Biometrics: Lower growth, better profitability

- Net sales below estimates, diligent cost control improves profitability
- Activities to increase growth continues
- Adjustments lead to a lower fair value of SEK 6.32 (7.25) per share

Despite lower sales, **Precise Biometrics** (Precise) reported a positive EBITDA for the quarter of MSEK 4.4. Revenue came in at MSEK 20.0 and costs decreased to MSEK 15.8.

The company is still affected by the weak US dollar and a continued cautious market situation. The sales development has been flat since the start of the year, raising concerns among investors.

The *Digital Identity* segment is still not showing any significant growth as the company has focused on client transition to the cloud-based solution. The annual recurring revenue (ARR) amounted to MSEK 18.4, the same level as in Q3 2024.

Biometric Technologies is experiencing rising demand, and the company continues to secure new projects together with customers and partners. Revenue grew sequentially by 6 per cent from Q2 but is still lower compared to the same period last year.

In Västra Hamnen's recent [video interview](#), CEO **Joakim Nydemark** emphasised that the activities the company has undertaken during the year will create better growth opportunities going forward.

However, the weaker-than-expected sales figures prompt us to adjust our projection for the coming quarters. We still regard Precise as a growth case, but the company has not delivered in line with our forecast. On the other hand, diligent cost control in Q3 has improved profitability. The adjustments to the model lead to a lower fair value corresponding to SEK 6.32 per share.

Biometric Technologies

For this segment, Precise gave some updates in the report, and our takeaways are.

- Ongoing global trade conditions are weighing on customer sales, particularly in the mobile sector, which has resulted in lower quarterly volumes year-on-year.
- Ultrasonic technology continues to expand and capture market share from older technologies. This development benefits Precise, which is among the few suppliers worldwide.
- Driven by heightened security needs and the expansion of AI, *BioLive* is becoming increasingly relevant across segments. The anti-spoof solution is applied in areas such as Android phones, national ID readers, and other applications within cybersecurity.

The growth was not what we had hoped for, but we still believe Precise is well-positioned to benefit from the adoption of the high-margin ultrasonic sensors in the smartphone segment. In the longer term, growth from new verticals such as automotive and retail will diversify revenue while the mobile segment remains the main value driver despite seasonal fluctuations.

Biometric synthetic data generation

Generating synthetic biometric data goes beyond simply producing a fingerprint or palm image. The main challenge is ensuring that the data accurately reflects the complexity and variety in real-world scenarios.

To address this, Precise has started integrating synthetic biometric data into its product development and offers this as a service to customers. Drawing on its expertise in biometrics, AI, and image analysis, the company can create large-scale synthetic datasets that improve security, privacy and development efficiency.

This capability enables faster and more reliable authentication and identification solutions, including anti-spoofing. Through synthetic data generation, Precise further strengthens its position in AI-based biometry and cybersecurity.

Digital Identity

Partnered with Avigilon

At the end of the quarter, Precise announced a partnership with **Avigilon**, a **Motorola Solutions** company specialising in video security and access control systems. As part of the collaboration, Avigilon will integrate *Precise Access* with its security platform.

Using face and palm recognition, the solution will offer fast and secure access while minimising the dependence on traditional credentials. With built-in two-factor authentication (2FA), it provides Avigilon's customers and partners with a streamlined, user-friendly system that ensures only authorised individuals will gain access.

New access control capabilities in Precise Visit by EastCoast

After the quarter, Precise announced an update to its visitor management system, *Precise Visit by EastCoast*, adding new features. By integrating elements from *Precise Access*, the system connects the visitor management process with physical access, allowing visitors to check in and gain door access using face or palm recognition, or a QR code. The update includes integrations with several access control systems in Scandinavia, such as **RCO**, **Integra**, **ARX**, as well as global platforms including **Genetec** and Avigilon.

The new functionality addresses the increasing demand for better security and more efficient visitor solutions. These functions support unmanned front desks, coworking spaces, and multi-tenant environments. Precise is continuing to expand *Precise Visit* by extending its geographic availability and increasing cloud-based subscriptions, combining visitor management and access control into a single system.

New partnerships will also add to Precise's ambition to grow the Digital Identity business.

Financial update after Q2

Table 2 presents the differences between our estimates and the actual outcome for the quarter. Revenue came in at MSEK 2 below our estimates, but costs were also significantly lower than forecasted. Overall, EBITDA exceeded our estimate by MSEK 3.0. The steady improvement throughout the year is a positive sign.

Cash and equivalents amounted to MSEK 31.3 at the end of the quarter. Together with stronger results and better-than-expected working capital, it improved the cash position. Remember that an instalment of MSEK 5 will be paid in Q4 due to the acquisition of EastCoast.

Table 2: Estimates vs actual, Q3 2025

**Adjusted for depreciation in OPEX

Adjusting the sales trajectory

Based on the Q3 report, we have revised our expectations for Q4 2025 and the coming years. We now estimate total sales of MSEK 82.9 for 2025, corresponding to MSEK 22.1 for Q4. Additionally, we have updated our sales projections for 2026 and 2027. In our initial analysis, we assumed a steeper growth trajectory than what the company has delivered. However, we remain optimistic, projecting sales growth of 23 per cent in 2026 and 28 per cent in 2027.

Improved gross margin

Also, these adjustments have led us to lower our ARR estimate for 2025 and 2026.

The gross margin for Biometric Technologies and Digital Identity was 84.6 and 50.0 per cent, respectively, in total, implying 75.8 per cent. It is promising that the overall gross margin has increased from 72 per cent to 76 per cent during 2025, and we estimate it will increase further to 77 before year-end.

We do not expect the company to report any major deviations in operating expenses in the coming quarters.

The model suggests a fair value of SEK 6.32 (7.25) per share

After revising our forecast, the model implies a fair value of SEK 6.32 per share.

Potential triggers

- Higher volumes in mobile phones
- Accelerated growth in Digital Identity
- Customer orders for hand recognition
- Commercial progress in the Aadhaar program

Disclaimer

This marketing material has been prepared by Västra Hamnen Corporate Finance AB ("Västra Hamnen").

The material has not been prepared by the regulations designed to promote the independence of investment research, and it is not subject to any legal prohibition on dealing ahead of the dissemination of the report.

The material has been prepared based on publicly available information that Västra Hamnen has deemed to be reliable. However, it cannot be guaranteed that the information is correct. The material is published for marketing purposes and does not purport to constitute a basis for any investment decision. The information provided herein does not constitute investment advice, and neither does the information take into consideration the individual needs, goals and circumstances of any particular recipient of this material. The reader is recommended to seek supplementary information elsewhere and to obtain relevant and specific professional advice before making any investment decision.

All views, opinions and conclusions communicated through this material shall be seen as valid on the publication date of this report only and are subject to change without notice. None of the information herein shall be construed as a recommendation or solicitation for the purchase or sale of any financial instrument.

In no event will Västra Hamnen be liable for direct, indirect or incidental damages resulting from the information in this report. Financial instruments can decrease as well as increase in value. Past performance is not indicative of future results.

The material is not directed at any such person, physical or legal, to whom the distribution of such material would imply a risk of violation of any laws or regulations applicable in Sweden or any other jurisdiction.

The contents of this report shall not be copied, reproduced or distributed to any third party without prior written permission from Västra Hamnen.

Conflicts of interest

Recipients should note that this material has been commissioned by the company mentioned in this report and that Västra Hamnen has received remuneration from the company for the production of the report. The remuneration is fixed and predetermined and in no way dependent on the content of the report or the views expressed herein.

The company mentioned in the report has reviewed the material before publication. The recipient may assume that this review has led to changes in the factual information presented in the report. Any assumptions, conclusions and scenarios are, however, the result of Västra Hamnen's analysis of available information.

Västra Hamnen has internal rules prohibiting all of its employees from buying or selling shares issued by companies with which Västra Hamnen has ongoing agreements to produce marketing material like the present.
