Key Highlights

- The classic 60/40 portfolio remake - adapted to our era and it is **Electrifying**
- Global equity replaced by **60% Green-Tech** companies who enables the transformation to a **Green World**
- Bonds replaced by **40% Precious Metals (focus Gold)** to both **protect** and have **strong return potentials**

Investment Objective

With a portfolio of companies that make the creation of a green world possible we go beyond the traditional sustainability funds so that investors can profit truly on this mega trend. The Green-Tech strategy is diversified by 4 sub strategies - [1] production of clean energy - [2] reduced energy consumption, reduced emissions and recycling - [3] energy storage/power - [4] extraction of the elements needed for Green-Tech solutions.

We see Precious Metals (Gold) as a stronger portfolio protection than bonds - during both short systematic shocks as well as in the future with high monetary inflation as the debt creation and money printing just goes on unabated.

Portfolio Holdings Strategy

The fund is traded daily and follows the UCITS (5/10/40) framework. Minimum 90% invested and holdings are divided into two main strategies - 60% (min. 50%) Equity Green-Tech and 40% (min. 30%) Precious Metals (focus Gold and all holdings as physical ETC:s). The 20 holdings within Green-Tech have an equal target at 3% and they are allowed to be within +/-35% of target weight and may be replaced fully. Holdings are traded at the most liquid markets (approximately 70% US and LN). Benchmark is 60% Nasdaq Global TR Index (NQGIT) plus 40% Bloomberg Barclays Global-Aggregate TR Index (LEGATRUU) in the funds/share class trading currency (class A = SEK).
