Key Highlights

- The classic 60/40 portfolio remake - adapted to our era and it is **Electrifying**
- Global equity replaced by **60% Green-Tech** companies who enables the transformation to a **Green World**
- Bonds replaced by **40% Precious Metals (focus Gold)** to both **protect** and have **strong return potentials**

Investment Objective

With a portfolio of companies that make the creation of a green world possible we go beyond the traditional sustainability funds so that investors can profit truly on this mega trend. The Green-Tech strategy is diversified by 4 sub strategies -

[1] extraction of the elements needed for Green-Tech - [2] production of clean/green energy -

[3] energy storage/power - [4] reduced energy consumption, reduced emissions and recycling.

We see Precious Metals (Gold) as a stronger portfolio protection than bonds - during both short systematic shocks as well as in the future with high monetary inflation as the debt creation and money printing just goes on unabated.
