Investment Objective

Silver [Ag] is a noble metal with a high resistance to corrosion and oxidation and has the best thermal and electrical conductivity of all metals making it indispensable in our high-tech and green world. It also has antimicrobial and non-toxic properties which make it useful in medicine, purifying water as well as other consumer products.

During 2025 we have seen many new All Time Highs in gold. In the coming years we expect the gold-to-silver ratio (GSR) to go below 30:1 (natural occurrence 16:1). Silver is close to a physical shortage and the dynamics for much high silver prices are in place. A true sweet spot for focused silver miners.

Holdings

Portfolio Holdings Target Weight Allocation. Live percentage may differ due to holdings change of value/cash flows.
