Key Highlights

- A modern remake of the classic 60/40 portfolio - adapted to the coming decades
- Global equity replaced by 60% Green-Tech companies who enables the electrification of the World
- Bonds replaced by 40% Precious Metals (focus Gold) to both protect and have strong return potentials

Investment Objective

The fund's green-tech strategy is diversified into several sub-strategies, giving investors broad exposure to the electrification theme. The fund consists of both companies that create green tech products (such as batteries and solar cells) and the companies that extract the metals needed for the green transition (copper and lithium). We believe that green-tech stocks will outperform global equity markets and that gold will outperform bonds in the coming decades. We also see Precious Metals (Gold) as a stronger portfolio protection than bonds - during both short systematic shocks as well as in the future with high monetary inflation as the debt creation and money printing just goes on unabated.

Portfolio Holdings Strategy

The fund is traded daily and follows the UCITS (5/10/40) framework. Minimum 90% invested and holdings are divided into two main strategies - 60% (min. 50%) Equity Green-Tech and 40% (min. 30%) Precious Metals (focus Gold and all holdings as physical ETC:s). All 20 holdings within Green-Tech have an equal target at 3% and they are allowed to be within +/-35% of target weight and may be replaced fully. Holdings are traded at the most liquid markets (approximately 70% US and 30% Global exUS). Benchmark is 60% Nasdaq Global TR Index (NQGIT) plus 40% Bloomberg Barclays Global-Aggregate TR Index (LEGATRUU) in the funds/share class trading currency (class B = EUR).
