Key Highlights

- Exposure to **critical raw materials**
- A broad **"metal portfolio"**
- A sector fund that **strengthens any portfolio**

Investment Objective

Metals have been essential in the development of human civilization. During the Bronze and Iron Ages, metals enabled humanity to take major leaps. During industrialism, industrial metals, such as iron, aluminium, copper, and zinc, became essential in building vehicles such as cars, trains, and airplanes. In today's electrified and growing high-tech world, humanity is entering a new metal age, increasingly defined by the demand for critical raw materials.

Critical raw materials enable the production of everything from power grids and electric vehicles to semiconductors and military systems. Without them, the transition to electrification, digital infrastructure, and technological advancement comes to a halt.

Holdings

Portfolio Holdings Target Weight (TW). Live percentage may differ due to Tactical/Actual Weight (TACW).

Portfolio Holdings Strategy

The fund is traded daily and follows the UCITS (5/10/40) framework. A broad sector fund that invests at least 90% in companies involved in the extraction and processing of basic materials with a special focus on industrial and new technology metals. All 25 holdings are equal-weighted with a 4% target weight and divided into two categories. Cat1: industrial base metals, Cat2: green-, high-, and bio-tech metals. All holdings are allowed to be within +/-25% of target weight. All holdings are traded at the most liquid markets (approximately 70% US and 30% Global exUS). Benchmark is M1WD0MM (MSCI ACWI Metals and Mining Net Total Return Index) in the funds trading currency (class A = SEK).

Unbundled, ISIN Class C SE0019175589. For more information, newsletters and updates please visit: auagfunds.com
