

Rockit Rocker GPSR

Product Markings

The batch number is shown on the product, the packaging and the outer cartons and starts with RBF or RB.

Code location on products:

Rockit Rocker AA battery version - on the battery lid inside

Rocker Rocker USB version - on the outside where it fits into the bracket

Zed - inside the battery compartment

Wooshh - on the clip just below the CE mark

Contact Information

The EU representative is provided on the packaging and instructions. It is also engraved on the two Rockit Rocker products. You can also use your details for products you supply so that this information is visible online to consumers.

Instructions and safety information

We discussed previously about the languages and getting the Scandinavian languages onto products where possible. We made adjustments on the latest batch of Rockit MK1 to include the safety warnings. It may be that you need to review your stock and apply stickers where necessary in the meantime.

Risk analysis and technical documentation

We can provide safety test documentation and declarations of conformity as required. However these should not be made available to download by the consumer but provided to businesses as required.

Corrective measures

If safety issues arise, take prompt action to mitigate harm. This may include product recalls or withdrawals and notifying affected consumers. Please notify us immediately of any concerns.

Online landing page

Display the same product and traceability information on the online landing page as on the physical product or its packaging. Can you please confirm that this information is accessible and functioning on your website and those retailers stocking products?

Manufacturer information is:

N2M Ltd
9 Bank Road
Kingswood
Bristol
