

Intermediate or Senior Backend Developer - Career Opportunity

Role Description

We are looking for an Intermediate or Senior Backend Developer to assist in the development of Canada's leading legal services marketplace. The successful applicant will work closely with our development team to build our backend APIs. The ideal candidate will be experienced in microservice and event-based architecture, pub/sub communication, various data storage technologies, and API testing methodologies.

Interested candidates should apply as soon as possible using the form found at www.goodlawyer.ca/careers. Applications will be evaluated as they are submitted and interviews will be scheduled to follow. The posting will be closed when a candidate is selected.

Responsibilities

- Write complex backend code in an event-based architecture that is secure, scalable, and reliable
- Take the lead on developing processes, testing, implementing new features, and fixing bugs
- Ship code in a fast-paced environment using CI/CD practices
- Evolve our microservice architecture to be scalable, fast, and secure
- Participate in improving and maintaining tooling, DevOps, and automation

Skills and Qualifications

- Minimum 5+ years of experience working with RESTful APIs, Microservices, Node, MongoDB, and event-based architecture using asynchronous communication
- Minimum 5+ years of experience leading backend projects from start to finish
- Experience in performance optimization, scaling solutions, and a strong knowledge of security best practices
- Familiarity with cloud-based infrastructure, specifically PaaS and SaaS-based solutions

Keys to a Successful Candidate

- Project owners who can engage with designers and stakeholders
- Individuals who focus on the bigger picture while seeing how code can be used and scaled
- Mentors, leaders, and strong communicators

- Team players who love being part of and leading an agile ecosystem

Compensation

Compensation is negotiable and based on experience. The Backend Developer is expected to work 30-40 hours per week.

Reporting and Office Arrangements

The Backend Developer will report directly to our Chief Technology Officer. They will be expected to regularly meet with their teammates at our downtown Calgary office. Goodlawyer has a hybrid work environment, where most of our team members work from the office 3 or 4 days a week.

Other Requirements

- Must be eligible to work in Canada

About Goodlawyer

Goodlawyer is a legal technology company on a mission to make lawyers more accessible to entrepreneurs. We've built a user-friendly platform that connects Canadian small businesses to lawyers with the expertise they need at prices that are consistently half the national average. Goodlawyer makes legal services convenient and affordable for clients and offers a source of new leads and revenue for lawyers.
