

Gerry Huber

Research Engineer

Heritage Research Group

Gerry Huber

Originally from Saskatchewan, in Canada, and joined Saskatchewan Highways and Transportation where he worked for 10 years

He joined the Asphalt Institute research center in Lexington, Kentucky. Was involved in the Strategic Highway Research Program (SHRP) working on the team responsible for developing Superpave.

Gerry now works as research engineer for the Heritage Research Group, the research arm of companies involved in the asphalt industry including Milestone Contractors based in Indianapolis, Indiana.

Over the years he has been involved in Expert Task Groups for asphalt binder and for asphalt mixture. He is currently involved in the FHWA Technical Working Group on Pavement Sustainability.
