The load borne by sports halls has risen hugely over the last two decades as a result of the increased frequency and intensity of use, for example for events. These extreme usage requirements have led to the fact that mainly

area-elastic sports floor systems are now used. Due to the extraordinary mechanical properties of the seamless PUR coating the wishes of the users are completely fulfilled.

CERTIFIED

INSTALLATION

Installation is carried out exclusively by a trained POLYSPORT partner. All POLYSPORT systems satisfy EU specifications – which can be confirmed via a quality certification for the project (TÜV PROFICERT).
