dentist) be currently certified in Advanced Cardiac Life Support (ACLS) to better ensure the patient’s safety. ACLS certification is only for adult patients whereas PALS certification is for patients below the age of 13.

The proposed rule changes require dentists to have PALS certification when treating patients below the age of 13 who have been sedated by the doctor or by a third party. This requirement ensures that both the dentist and the third party anesthetics provider can both assist the child patient in the case of an emergency.

FISCAL AND ECONOMIC IMPACT STATEMENT
FOR ADMINISTRATIVE RULES
RULE TITLE: Physician Licensure and Practice; Telemedicine

1. ESTIMATED IMPLEMENTATION COSTS (SAVINGS) TO STATE OR LOCAL GOVERNMENT UNITS (Summary)
   The estimated implementation costs to the Louisiana State Board of Medical Examiners are approximately $492 in FY 2016.
2017 for the notice and rule publication costs. There are no estimated implementation savings to the state or local government units through promulgation of the proposed rule changes, which are needed to conform the Board's telemedicine rules to Acts 630 and 252 of the 2016 Regular Session of the Louisiana Legislature. Among other items, the proposed rule changes implement the following actions:

(i) Remove the requirement that a physician practicing medicine by telemedicine maintain a physical practice location in this state or have an arrangement with a physician who does (408A, 408D.3; 7503A, 7507A.1-2);

(ii) Authorize the use of telemedicine by interactive audio without the need for video if the physician determines that he or she can satisfy the same standard of care as if the services were provided in person (7503A, 7505B);

(iii) Delete the requirement for at least one in-person visit by a physician who prescribes controlled substances by telemedicine for patients being treated in a healthcare facility required to be licensed by this state, which possesses a current registration with the U.S. Drug Enforcement Administration ("DEA") (7513C.3.a);

(iv) Maintain the need that a physician be capable of referring a patient to another physician or arranging for follow-up care within the state if indicated (7507B.2.d);

(v) Provide for Board to have access to patient records (7509A.5);

(vi) Clarify the status of a telemedicine permit (408A), and provide for documentation of telemedicine encounters (7509A.1).

II. ESTIMATED EFFECT ON REVENUE COLLECTIONS OF STATE OR LOCAL GOVERNMENTAL UNITS (Summary)

There is no anticipated effect on the Board's revenue collections or those of any other state or local governmental unit.

III. ESTIMATED COSTS AND/OR ECONOMIC BENEFITS TO DIRECTLY AFFECTED PERSONS OR NONGOVERNMENTAL GROUPS (Summary)

The proposed changes are not anticipated to have a material effect on costs, paperwork, or workload of physicians and/or income of licensees or non-governmental groups. The proposed rule changes may affect physicians in the following ways:

(i) Out-of-state physicians who possess a license or apply for a telemedicine permit will no longer need a referral arrangement with a physician who maintains a physical practice location in this state;

(ii) Physicians are authorized to use telemedicine by interactive audio without the need for video if the physician determines that he or she can satisfy the same standard of care as if the services were provided in person;

(iii) Eliminates the requirement for at least one in-person visit by a physician who prescribes controlled substances by telemedicine to a patient being treated in a facility licensed by the state which possesses a current DEA registration.

Because there is no information or data available either as to the number of physicians who utilize telemedicine in their practice, or the extent to which the changes will impact those that do, the Board is not in a position to estimate the impact of the proposed changes. However, the proposed rule changes may provide an economic benefit to the public by enhanced access to medical services via telemedicine and may reduce the costs associated with the delivery of certain medical services.

IV. ESTIMATED EFFECT ON COMPETITION AND EMPLOYMENT (Summary)

It is not anticipated that the proposed rule changes will have any impact on competition or employment in either the public or private sector.
