✓ Subjective

Presented today for a wellness exam to become established as a patient. Patient recently started Cyclosporine 200mg/mL at 2mg/kg IM every 30 days at Always Sunny Pet Health, LLC. Owner is requesting continuation of therapy locally as travel will quickly become problematic. Patient is overdue for the second injection. Owner did see significant improvement with the first.

Meds: Gabapentin 600mg q 8-12 hours, Levothyroxine 1.2mg q 12 hours, Galliprant 120mg q 24 hours, Omega

Supplements, Cytopoint as needed.

Concerns: None.

MEDICAL RECORD CHECKLIST

The document should have the **SOAP (Subjective, Objective, Assessment, and Plan)** notes present.

If you do not see this information present, the document may be insufficient for filing a claim.

Please reach out to your vet for additional documentation.

✓ Objective - Oral Health Abnormal **ABNORMAL CONDITION** - Mild enamel staining

Objective - General Appearance Normal **NORMAL CONDITION**

Objective - Integumentary Normal **NORMAL CONDITION**

Objective - Musculoskeletal Abnormal **ABNORMAL CONDITION** - Overweight with planned weight loss.

Patient is weak in the pelvic limbs. Previous records indicate possible hip dysplasia and significant pelvic limb muscle atrophy. There is mild pelvic limb muscle wasting today. Patient struggles some to stand but is able to do so without assistance. Owner reports that patient can do several steps now without assistance which was not the case prior to starting Cyclosporine.

Objective - Respiratory Normal **NORMAL CONDITION**

Objective - Digestive Normal **NORMAL CONDITION**

Objective - Genitourinary Normal **NORMAL CONDITION**

Objective - Eyes Normal **NORMAL CONDITION**

Objective - Ears Normal **NORMAL CONDITION**

Objective - Neural Systems Normal **NORMAL CONDITION**

Objective - Lymph Nodes Normal **NORMAL CONDITION**

Objective - Circulatory Normal **NORMAL CONDITION**

✓ Assessment

Cyclosporine while FDA approved for humans is completely extra label for dogs. I am not familiar with any studies that support or disfavor the use.

It is unknown if the product is safe or effective. Reiterated this again to the owner. Had owner sign a consent form for experimental/ not recommended therapy. Patient will also need semiannual exams since requires DEA #.

Owner elects to continue with Cyclosporine trial as outlined by Always Sunny Vet following roughly the protocol.

✓ Plan

Cyclosporine 200mg/mL - Gave 0.62mL IM RH
