New RUKO step drill at the International Hardware Fair 2018

Holzgerlingen (Germany), January 31st, 2018 – RUKO GmbH Präzisionswerkzeuge, manufacturer of drilling, countersinking and cutting tools, introduces at the International Hardware Fair from March 4th to 7th 2018 a special highlight: the new generation of RUKO step drills.

At the International Hardware Fair, RUKO will be offering insights into how precision tools at their plant in Germany are produced. In addition, visitors to the application area of the RUKO stand in hall 10.2, stand C004-D005, will be able to test precision tools such as the new step drill.

The key to success of the new RUKO step drill is based on a complete revision of the cutting edge geometry. The result is an improvement of all technical features of the step drill. In particular, the optimized cutting edge design ensures a significantly smoother drilling process.

“Our team has done an excellent job in the development of the new step drill”, explains Managing Director Ali Dalgic feeling satisfied. “Thanks to our decades of expertise in combination with the technical possibilities of our new CNC grinding machines, we are currently setting a new standard. In addition to the step drill, this also applies in particular to our high-tech countersink, *ULTIMATECUT*.”

About the RUKO group

RUKO GmbH Präzisionswerkzeuge has been one of the world's leading manufacturers of high-quality drilling, countersinking and cutting tools for metalworking for more than 40 years. The medium-sized, internationally operating industrial company develops, produces, and sells products and individual solutions for all production stages of the machining industry. It serves a worldwide clientele with 250 employees in seven branches and two production sites.

About the International Hardware Fair

The International Hardware Fair, from March 4th to 6th 2018, has been recognized as the world's number 1 in the hardware industry since 2016 and is now in its 40th edition. Approximately 2,700 exhibitors from more than 50 countries are expected to attend the four-day event, where they will present innovations and the latest developments in the segments of tools, industrial supplies, fastening and connection technology fittings as well as building, and do-it-yourself supplies. In 2018, the tools segment represents the trade fair's core competence.
