

REDUCE • REUSE • RECYCLE

**REPACK**  
by RUKO

It is time to rethink.

# The pollution of our planet by plastic

**86** Millions of tonnes of plastic waste is in our oceans

**12** Millions of tonnes of waste are added annually

**75** Percent of this is plastic

**450** years for a plastic bottle to decompose in the sea

**407** Millions of tons of plastic are produced annually

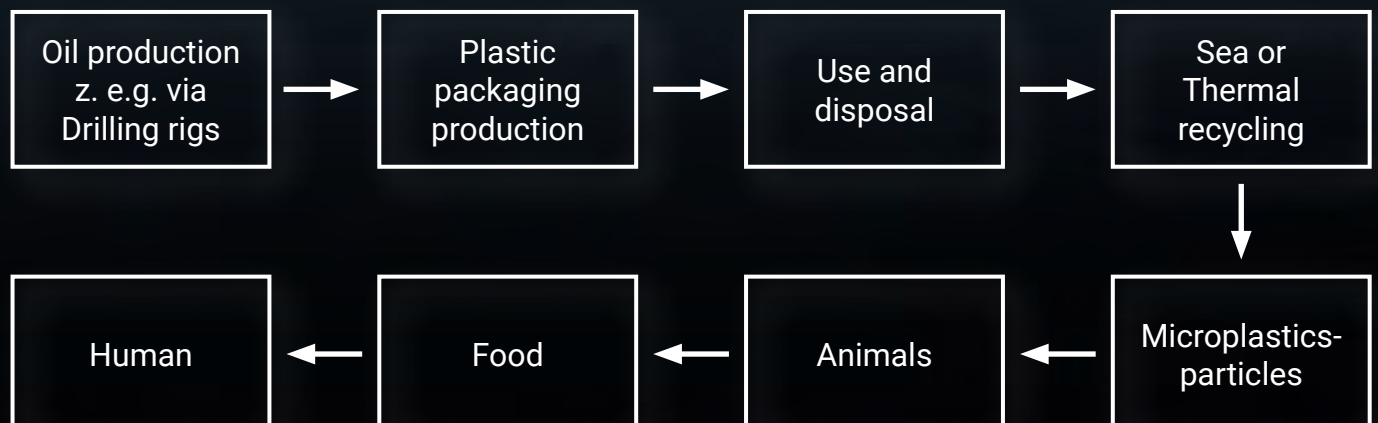

**146** Millions of tons of it is packaging material

The path of plastic packaging into the food chain.

Take responsibility.

# Reduce. Reuse. Recycle.

## REPACK by RUKO

- Plastic free
- Recyclable
- Compostable

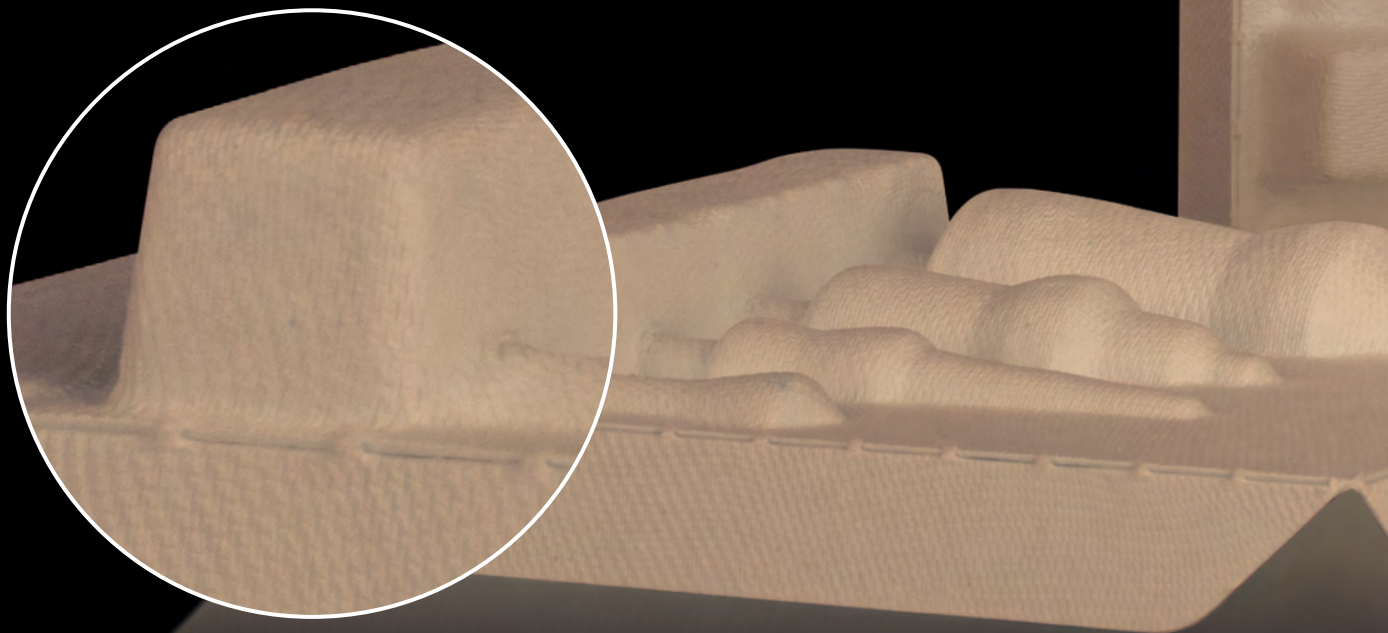

**REPACK**  
by RUKO

Natural components.

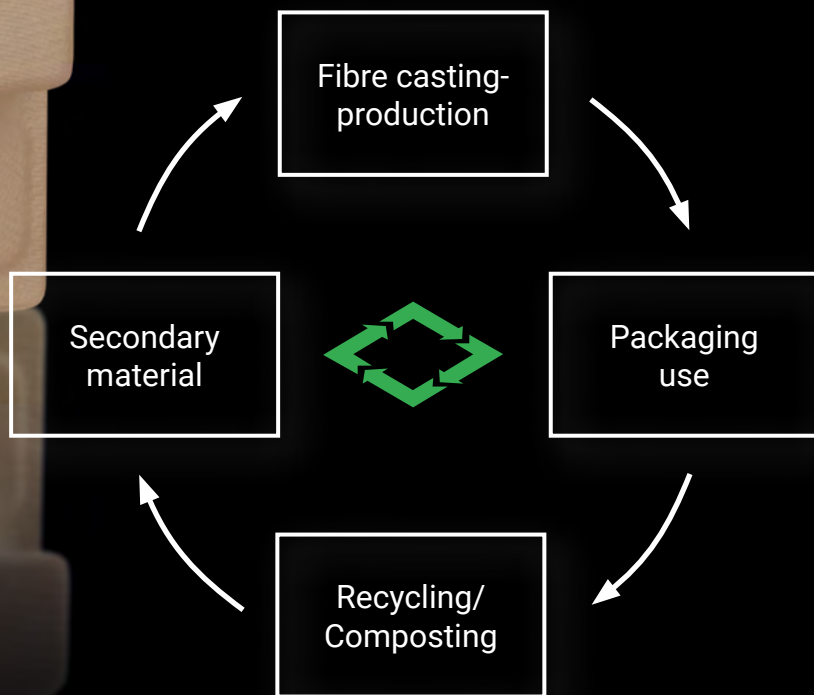

# **REPACK by RUKO consists of natural cast fibre**

**Fibre castings** are made from  
**recycled paper** and **natural materials**  
such as hay and straw.

**REPACK**  
by RUKO

Protective properties.

# Organically sourced coating

REPACK by RUKO is provided  
with an **organic coating**,  
without chemical additives.

## Shock resistant

The cast fibre material is extremely resistant, capable of absorbing shocks; providing optimal protection to the contents.

## Liquid repellent

An organic based coating protects the surface of the packaging from liquids such as cutting oil, avoiding any degradation and maintaining the integrity of the pack.

## Heat resistant

The organic coating also provides heat protection to the pack, avoiding damage directly after use, from hot tooling.
