Agriculture Future of America 2009 Annual Report

# Ag-ri-cul-ture [ag-ri-kuhl-cher] n.

"	(Insert your definition here)
	(

How do you define agriculture? Folding the industry into one definition has never been easy, but today, with new technology and global expansion, creating a definition that encompasses all aspects of agriculture is next to impossible.

Unless...we define it as individuals.

Agriculture Future of America (AFA) recognizes that each of us, because of our personal connection to the industry, has a different perspective of agriculture. Each person plays an instrumental role in the industry. From the scientist, to the producer, to the manufacturer, to the marketer, to the consumer...each person is connected to this industry we define as agriculture.

Since its inception in 1996, AFA has embraced the challenge of preparing a new generation to lead this dynamic industry. As the definition of agriculture evolves, AFA works harder to identify innovative leaders, encourage a transforming passion and support the journey of young people who are embracing this industry.

The AFA Leader Development Model illustrates how AFA continues to meet the needs of this growing industry. The

center of the leader development model is open to exemplify that each person is unique, as is their role in agriculture. The 2008 Student Advisory Team chose "I Define Agriculture" as the theme for the annual Leaders Conference to encourage students to embrace the diversity that is our industry, and focus on how they will improve agriculture through passion and leadership.

The growth AFA has experienced this past year proves that agriculture believes in its own future. The community, university and corporate partners listed on the final pages of this report have united to join AFA in its efforts to provide personal and professional development opportunities to these future leaders.

Regardless of your definition of agriculture, you can be assured it will evolve. What will remain constant, however, is the need for trained, creative and intelligent men and women to ensure that the future of agriculture remains bright.

This 2009 report shares how AFA assists the future definers of agriculture in their preparation to be new generation leaders.

usell Wedher

K. Russell Weathers

President and CEO. Agriculture Future of America

"The environment and agriculture are inextricably related."

# My name is Kathryn, and I define agriculture.

I became interested in the agriculture and food industry because it ties heavily into environmental issues. The process of food production directly links to human consumption of resources, health of the natural world and the consumer and environmental consequences of our food system's production and transportation.

The public eye is becoming ever more aware of our agriculture and food system. People want to know where their food comes from and its methods of production. As a lawyer specializing in environmental issues, it will be important for me to be knowledgeable about agriculture and its relation to the environment.

Kathryn Sinner – Fargo, ND College of Saint Benedict Environmental Studies

# Ag-ri-cul-ture [ag-ri-kuhl-cher] n.

(Insert your definition here)

How do you define agriculture? Folding the industry into one definition has never been easy, but today, with new technology and global expansion, creating a definition that encompasses all aspects of agriculture is next to

Unless...we define it as individuals.

Agriculture Future of America (AFA) recognizes that each of us, because of our personal connection to the industry, has a different perspective of agriculture. Each person plays an instrumental role in the industry. From the scientist, to the producer, to the manufacturer, to the marketer, to the consumer...each person is connected to this industry we define as agriculture.

Since its inception in 1996. AFA has embraced the challenge of preparing a new generation to lead this dynamic industry. As the definition of agriculture evolves, AFA works harder to identify innovative leaders, encourage a transforming passion and support the journey of young people who are embracing this industry.

The AFA Leader Development Model illustrates how AFA continues to meet the needs of this growing industry. The

center of the leader development model is open to exemplify that each person is unique, as is their role in agriculture. The 2008 Student Advisory Team chose "I Define Agriculture" as the theme for the annual Leaders Conference to encourage students to embrace the diversity that is our industry, and focus on how they will improve agriculture through passion and leadership.

The growth AFA has experienced this past year proves that agriculture believes in its own future. The community, university and corporate partners listed on the final pages of this report have united to join AFA in its efforts to provide personal and professional development opportunities to these future leaders.

Regardless of your definition of agriculture, you can be assured it will evolve. What will remain constant, however, is the need for trained, creative and intelligent men and women to ensure that the future of agriculture remains bright.

This 2009 report shares how AFA assists the future definers of agriculture in their preparation to be new generation leaders.

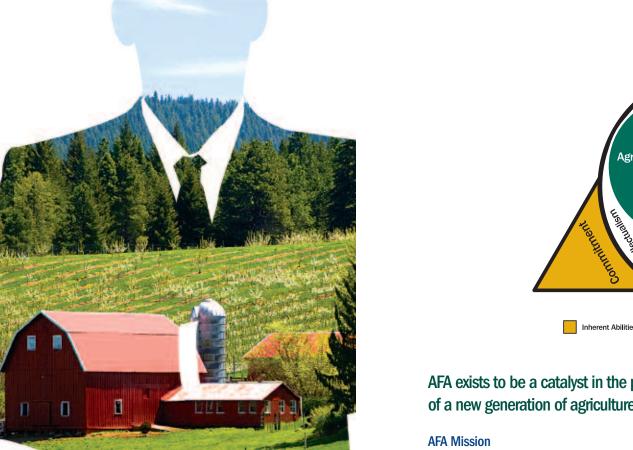

President and CEO, Agriculture Future of America

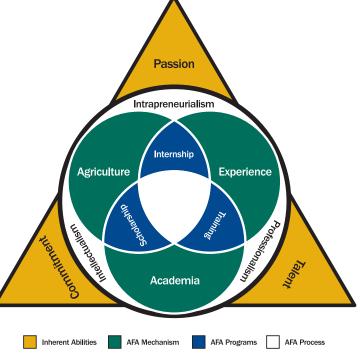

"Ever since I was a little boy, I've wanted to farm, just like my dad and my grandpa."

# My name is Ryan, and I define agriculture.

When I was in fourth grade, my grandpa gave me an interest free loan to buy four cattle. I fed them until they were finished and used the profits to buy more cattle. I continued this for several years until I had enough money to operate a cattle business of my own. This past year I sold ninety-six head of finished cattle, and plan on selling another fifty head before I attend college next fall.

Ryan Augustine - Rose Hill, IA Iowa State University Agricultural Studies

# AFA exists to be a catalyst in the preparation of a new generation of agriculture leaders.

To create partnerships that identify, encourage and support outstanding college men and women preparing for careers in the agriculture and food industry.

### **AFA Leader Development Model**

AFA's leader development model (above) shows how the AFA experience plays a role in developing human capital for the

agriculture industry. The young men and women that AFA invests in share three characteristics - they are talented, passionate and committed to a career in agriculture.

AFA's mechanisms for leader development are agriculture, experience and academia through which the AFA scholarship, internship and training programs are implemented.

AFA's success comes from its network of unique partnerships which creates an atmosphere that stimulates the development of professionalism, intrapreneurialism and intellectualism - each a key factor in leader development.

# I-den-ti-fy [ahy-den-tuh-fahy] v.

"To recognize and distinguish students as being talented, passionate and committed to the agriculture industry."

From its beginning, AFA has focused on providing opportunities for leaders: young men and women who are talented, passionate and committed to the agriculture industry. AFA partners with communities, universities, corporations and individuals to identify these leaders, and invite them into the AFA program.

Through these partnerships, AFA has provided over 5,500 young men and women with career enhancement opportunities during the past 13 years. AFA's community partners provide an invaluable link to young leaders who are thriving within their communities through their scholarship programs. University partners help AFA identify intelligent, motivated and diverse individuals, many of whom did not grow up in agriculture, but have found a passion for it through academics. AFA corporate partners recommend and sponsor exceptional young people who have served in their company internship programs.

Partner investments come full circle when these young men and women return to their community, university or corporation, ready to make a lasting impact. They combine their talent, passion, and commitment with the knowledge and skills gained through AFA programs, and are ready to lead the way into the future of the agriculture industry.

AFA also provides specialized development experience to student leaders through its Student Advisory Team (SAT) and Ambassador Program. The SAT is a group of outstanding young men and women, selected annually, to serve as envoys for AFA to corporate and association leaders, as well as to their respective universities. The Ambassador Program identifies a current university student on core AFA campuses to represent AFA in promoting the organization to faculty, staff and students.

"I envision myself as a crop management specialist working hand-in-hand with farmers."

## My name is Cary, and I define agriculture.

I see myself sharing results of the latest research and using the newest technology to help farmers enhance techniques and increase their profitability.

Today, agriculture as an industry faces the challenge of a public that lacks full appreciation and knowledge as food production moves farther and farther away from the individuals who eat it. I hope to make a difference by being involved in my local community and sharing my knowledge and appreciation of the industry with others.

Cary Yates – Monroe City, MO University of Missouri Plant Science/Crop Management Specialist

# En-cour-age [en-kur-ij] v.

"To excite and embolden college men and women in the agriculture industry by fostering a network of inspiration in which they can thrive."

AFA provides a foundation that college men and women can build on as they begin their careers in the agriculture and food industry. Not only does this foundation provide the skill training necessary to contribute to the industry, it also provides students access to a network of encouragement that ignites their passion for a career in agriculture.

In today's fast-paced world, it is easy for a young man or woman to feel as though they are isolated by their interests in the agriculture and food industry. AFA, by providing numerous opportunities for peer to peer interaction at events such as the AFA Leaders Conference, reminds students they are not alone

in their zeal for agriculture. Industry executives, business and academic partners, individual investors, Alliance members and AFA staff work to ensure that young men and women are aware of the abundant opportunities in this dynamic industry.

AFA encourages students to take time to assess what agriculture means to them. The 2008 AFA Leaders Conference, with the theme, "I Define Agriculture," focused on letting students know they each have a unique place in this industry, and therefore, have a part in defining it. AFA encourages students to expand their knowledgeable of agriculture through academics and first-hand experience so they can shape the future of the industry.

"I believe the ability to end hunger is within our reach, and I want to be a part of the solution."

## My name is Brittaney, and I define agriculture.

As the daughter of a Nigerian immigrant, I am keenly aware of hunger and starvation around the world. These stories kindled a desire in me for agriculture, which grew over the past three years into a career opportunity.

My focus is on increasing investments and funding for small farmers around the world; particularly those who are disadvantaged and desperately need monetary assistance to enable them to increase their crop yield. My desire is to work with these farmers to develop technologies to permit them to grow multiple and varied crops on their land, resulting in increased yield.

Brittaney Obi – Milwaukee, WI University of Kentucky Agricultural Biotechnology and Spanish

# **Sup-port** [suh-pohrt] v., n.

"To provide the foundation for college men and women to receive the tools they need to be a new generation of leaders in agriculture."

Franklin D. Roosevelt once said, "We cannot always build the future for our youth, but we can build our youth for the future."

AFA strives to be a catalyst in the preparation of a new generation of agriculture leaders. In order to achieve this, AFA's programming provides a framework to develop human capital; a framework to support the development of future leaders.

To construct this frame, the AFA leader model identifies three key programming initiatives: training, scholarship and internship. These three program areas outline the support AFA provides its students throughout the year.

### **Training - Develop Leader Skills**

AFA Leaders Conference provides an opportunity for college students, presenters and sponsors from across the country to come together and share their knowledge, experience and passion for agriculture. The four-day conference, held in Kansas City, Mo., is a personal and professional development event that focuses on developing life skill sets through self-assessment, communication, embracing change and lifelong learning.

Students ready to take that next step above and beyond the conference can apply to become members of the AFA Student Advisory Team. This team of nine men and women works to plan and host the AFA Leaders Conference and represent AFA to corporations and associations across the country.

### Scholarship - Invest in Academic Achievement

During the past 13 years, AFA partners have provided more than \$5 million in scholarships to over 1,300 students pursueing four-year degrees at colleges and universities across the nation. As the cost of college education increases, students in agriculture need the support of AFA to get the education necessary to become a new generation leader. AFA scholars are given the opportunity to attend the AFA Leaders Conference as a component of this scholarship program.

### Internship - Learn through Experience

A crucial part of preparing a new generation leader in agriculture is hands-on work experience. Throughout the year, AFA facilitates connections between college students and employers. Through events like the Opportunity Fair at Leaders Conference, AFA enables students the chance to network and search for internships and other experiences in their intended career fields. At the same time, employers are exposed to a crop of potential employees that rank among the best in the nation.

Additionally, the AFA Alliance provides an excellent resource for connecting AFA leaders to companies where they can make a positive impact. The Alliance is a personal and professional organization for men and women in the beginning years of their careers in the agriculture and food industries. Members of the Alliance serve as mentors to current AFA students and encourage them to be life long learners.

"We must use and manage the world's natural resources in the most efficient and sustainable way possible."

# My name is Seth, and I define agriculture.

I hope to start my career in the USDA Natural Resources Conservation Service or United States Forest Service. Once I gain experience and networking from my career in public service, I hope to start my own forestry and natural resource consulting business with hopes of making my community, our nation and the world more environmentally friendly and sustainable.

Seth Harden – Frankfort, IN Purdue University Forestry/Natural Resources and Environmental Science

## **AFA Alliance**

"An association of emerging young professionals in agriculture who recognize that lifelong learning is critical to the future of their industry."

The Alliance allows young agriculture professionals across the nation to gather, virtually and physically, to discuss the future of the agriculture industry and common situations they face. This alliance is about more than professional development and hot industry issues. It is about pooling resources from a diverse group of individuals who can help each other become better leaders in the agriculture industry.

Personal and professional development is key to the mission of the Alliance. This is accomplished through the virtual network, mentoring opportunities, committee meetings and the Alliance Forum. The Forum allows Alliance members to come together for a two-day development program that

consists of expert panel discussions and sessions covering the latest topics, issues and opportunities in the agriculture industry. Forum programs have also addressed development topics such as building trust in the work place, unleashing talent, managing people, intergenerational expectations, worklife balance and civic and community leadership.

Many opportunities for leadership exist within the AFA Alliance, from attending the annual forum, to participating on the planning committee and mentoring college students through the AFA Leaders and Career Development Programs.

"I plan to decrease the amount of agriculture illiteracy in our country and the world."

## My name is Amie, and I define agriculture.

As an agricultural educator, I believe it is important to emphasize the impact agriculture has on all citizens. Agriculture is a large part of the economy for many countries and it provides jobs, houses, clothing, food and shelter.

Ultimately, I plan to be an agricultural ambassador. I will travel the world and teach people new agricultural practices that better suit their landscape and climate.

Amie Stillman – Weyauwega, WI University of Wisconsin River Falls Agricultural Education, Secondary Chemistry Education

# Leader in Agriculture Award

"An annual award that recognizes two individuals who have made significant contributions to the food and agriculture industries through their leadership and support of youth education."

In 2008, AFA honored Nancy Pellet, chairman of the Farm Credit System Insurance Corporation Board of Directors and Dr. Jon Wefald, president of Kansas State University (retired), with the Leader in Agriculture Award.

Nancy C. Pellett was appointed to a six-year term on the Farm Credit Administration (FCA) Board by President George W. Bush on November 26, 2002. She served as Chairman of the Board and CEO of FCA from May 2004 until May 2008.

Ms. Pellett also serves as Chairman of the Board of Directors of the Farm Credit System Insurance Corporation, which is responsible for ensuring the timely payment of principal and interest on obligations issued on behalf of FCS banks.

In partnership with her husband, she managed Prairie Hills, Ltd., a feedlot, cow-calf and row-crop operation in Atlantic, lowa, from 1966 until her appointment to the Board. While she serves her term as FCA Chairman and CEO, her husband, son and daughter-in-law continue to operate this fifthgeneration family farm.

**Dr. Jon Wefald** was born in Minneapolis and moved at age six with his family to Minot, North Dakota. He attended Pacific Lutheran University where he received a B.A. in history in 1959. Wefald then earned his M.A. in history and political science from

Washington State University in 1961 and Ph.D. in history from the University of Michigan in 1965.

In 1965, Wefald returned to Minnesota, taking his first faculty position at Gustavus Adolphus College, where he taught history for five years. From 1971 to 1977, he served as Minnesota's Commissioner of Agriculture and guest lectured. In 1977, he became President of Southwest State University in Marshall, Minnesota. In 1982, he became Chancellor of the six state university system of Minnesota.

In July 1986, Wefald began his service as president of Kansas State University. During his tenure at K-State, enrollment increased from 17,000 to 23,000 and due largely in part to Wefald's dedication to scholastic achievement, K-State students have won 124 Rhodes, Marshall, Truman, Goldwater, and Udall Scholarships from 1986 to 2008 — more than any university in America. Wefald retired from his position as university president following the 2008-2009 academic school year, but will continue as a part-time professor of leadership studies and history at K-State.

"My goal is to be involved with the policies and laws governing food production."

## My name is Jessie, and I define agriculture.

I plan to work as a herdsman on a dairy operation in California. I plan to work with relations between farm owners and migrant workers, not only with language translation and cultural differences, but with labor policies and laws.

Practical experience, through employment on a variety of dairy farms, will allow me to refine my management techniques, while industry work will broaden my overall knowledge.

Jessie Ingvalson – Caledonia, MN University of Minnesota Animal Science/Dairy Production

## **Annual Review of AFA**

AFA is committed to identifying, encouraging and supporting college men and women who are pursuing careers in the agriculture and food industries. Fulfilling this commitment would not be possible without the support of our many partners who share AFA's vision, and invest in our mission.

The agriculture and food industries need talented, committed and passionate young people who are the product of AFA. As the average age of the agriculture work force continues to climb, these young men and women need to step into leadership roles to ensure the future success of these critical industries. Through AFA, these future leaders have an opportunity to perfect skills, expand knowledge and gain valuable, practical experiences before they enter the workforce.

To the individuals, businesses, corporations, associations, universities and foundations that believe in the future of American agriculture: thank you for your commitment to the vision of AFA. Preparing a new generation of professionals for agriculture is vital to us all, and we appreciate the support of every partner. The following pages serve as a testimonial of our partners' commitment and underscore their dedication to the AFA vision. If you are not currently engaged with us, we invite you to join AFA and help strengthen this human capital resource for the future of American agriculture.
