

Agriculture Future of America (AFA) Policy Institute promotes understanding of legislation, trade and policy-related career opportunities through networking and exposure to current events and trends in the policy sector. Students are selected each year for this three-day program where legislative representatives and agricultural policy leaders are connected with future talent.

STUDENTS GAIN:

- Awareness of the role policy, regulation and trade play in agriculture and food
- Connections with legislative representatives to learn more about the policy process
- Insights on issues, trends and the culture and environment of the nation's Capital
- Preparation for a career in the agriculture and food industry
- Understanding of the need for policy, regulatory and trade awareness in all career paths
