

EMPOWERING YOUNG LEADERS.

AgXperience-Biofuels

When: September 15, 2026 | 11:45 a.m. - 1:30 p.m. EDT

Where: SD-B48 | Dirksen Senate Building | Washington D.C.

What: The AgXperience- Biofuels session is an immersive learning opportunity designed to help students explore the role of biofuels and renewable energy in agriculture, energy innovation and the broader economy while gaining a deeper understanding of the industry in real-world settings.

We are seeking industry professionals who can speak to biofuels and renewable energy within agriculture policy.

How: In this session, you'll engage directly with students in small-group discussions focused on your work in biofuels and renewable energy. You will share insights into the technologies, policies, market trends and career pathways connected to renewable fuels, sustainable energy and agriculture. Students will better understand how biofuels contribute to energy security, rural economies, sustainability goals and the future of agriculture.

Why: This is a meaningful opportunity to give students a firsthand look at the biofuels and renewable energy sectors and help shape the next generation of agricultural and energy leaders.

Your Role: You will help bring biofuels and renewable energy to life by:

- Sharing your professional journey and current role in biofuels, renewable energy or a related field
- Providing real-world context on biofuel production, renewable energy policy, sustainability, market demand and current events impacting the sector within agriculture.
- Encouraging open dialogue and student questions about innovation, challenges and opportunities in renewable fuels
- Helping students connect their interests to potential careers in biofuels, renewable energy, agriculture, policy and sustainability
