“

Great products built from superior materials **to stand the test of time**. We have used their cladding products many times to get a **professional, sleek finish** to our garden buildings. **Samples are also free and sent at no cost!** Great people and products at a reasonable cost. Would recommend every time.

Carlilly Building Solutions, Trustpilot

“

I cannot praise highly enough **the quality** of EnviroBuild Cladding. It also **has a fire rating where others cannot offer one**. The support for the product is excellent as well.

James, Trustpilot

The Slatted Collection

Slatted

CLASS-D FIRE RATING

Engineered for the highest performance.

With a slatted design, weather-resistant finish, and composite core, this durable cladding blends the strength of recycled materials with the elegance of natural wood, providing exceptional durability and style for any facade or interior accent.

Balau Slatted

Case Study 

Belvoir Vue

“

We decided to use EnviroBuild on the Belvoir Vue project because we liked the product in aesthetic terms but were also looking for a product that would perform with stability and durability.

From the outset, the project was intended to be sustainable and, once again, the product was a perfect choice.

CBP Architects

Pictured: Stone Explorer

Using clean lines and sophisticated lighting, this building is both articulate and elegant, conveying an elevated piece of architecture that both stands out and blends in.

Easy installation

Save precious time

With the **simple hidden fixing system**, everything quickly clips into place.

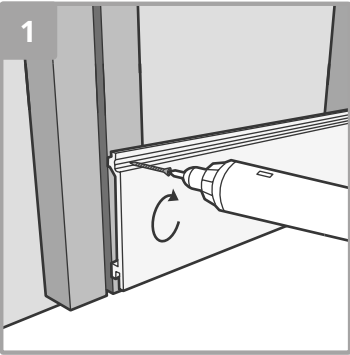

Enjoy a seamless look

Innovative hidden fixing system will leave your cladding with a **beautifully flush finish** and **minimal surface screws**.

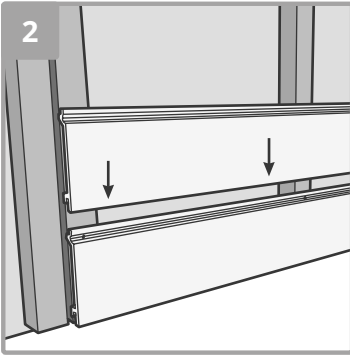

Full Guide

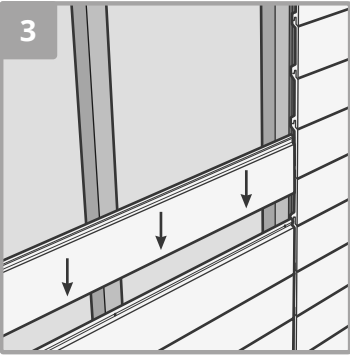

Find the full installation guide in the resource centre on our website, or simply scan the QR code.

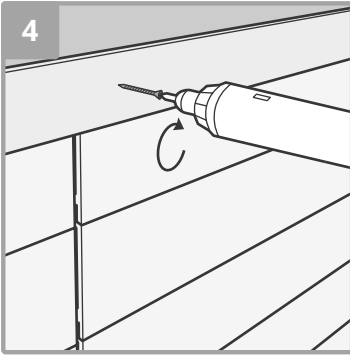

Pre-drill oversized holes and fix with screws to the substructure.

Clip the second board to the groove of the first board.

Repeat, making sure to shape boards around openings.

Attach finishing profiles to conceal edges and gaps.

Feel confident in making the sustainable choice

We endeavour to provide the most sustainable products on the market. Here's why your purchase can make a positive impact on the environment.

1 million kg plastic diverted from landfill annually.

That's the equivalent of **52.6 million plastic bottles.**

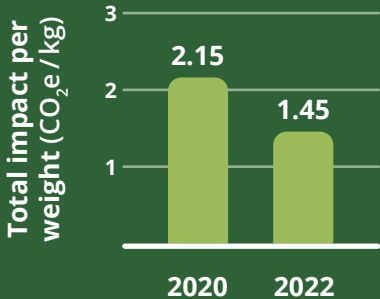

We use wind power

From 2021 Hyperion® Composites have been manufactured using **100% renewable wind energy**. This gave Hyperion® Composites a **carbon footprint (CO₂e) reduction of 33%**.

87% recycled material

This includes 57% FSC® 100% certified wood powder, 30% recycled HDPE, 6% stone powder and 7% additives.

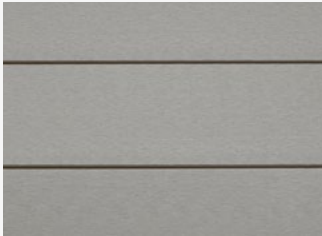

Environmental impact (CO₂e / kg) reduced 32.6% since 2020

Hyperion® cladding boards will produce up to 64% less CO₂e across its lifetime than softwood timber cladding boards.

Supporting sustainable initiatives

61.3 million trees protected and counting*
*Between 2016-2022

Whilst our products are revolutionising sustainable solutions in the construction industry, this is where EnviroBuild can make a direct impact on tackling climate change.

Here you can see the direct impact we have had on some of Rainforest Trust's inspiring projects. As we grow, so does the impact we make.

We donate **10% of all profit** to sustainable causes.

Golfo Dulce, Costa Rica

Acres Saved
4,087 of marine habitat

Threats
Illegal dumping of waste and poor ocean management endangering local species.

We have donated to

51 projects across 25 countries.

between 2016 & 2022

Papa New Guinea Rainforest

Acres Saved
2,577 of rainforest

Threats
Aggressive oil-palm expansion, deforestation, poaching.

North Sumatran Rainforest

Acres Saved
84,795 of rainforest

Threats
Aggressive oil-palm expansion, deforestation, poaching.
