

Role: Senior Project Manager

About blubolt

We power journey-led growth for ambitious e-commerce brands.

We optimise the entire on-site customer journey, from first click through to repeat purchase, aligning every decision to what customers actually need.

By combining data, UX, marketing, and technology, we remove friction, prioritise what matters, and deliver measurable improvements that compound over time. The result: stronger conversion without inflated acquisition costs, and deeper customer loyalty through better experiences.

We bring deep accountability, boutique agility, and enterprise-grade delivery.

The Role

As a Senior Project Manager, you will own the successful delivery of e-commerce projects and high-value client relationships across both new builds and retained engagements.

You'll lead end-to-end execution across Shopify builds, migrations, integrations, and Growth Services (SEO, CRO, email, data & analytics), ensuring work is delivered to a consistently high standard – on time, on budget, and aligned to meaningful client outcomes.

This is a hands-on role at the centre of execution. You'll coordinate cross-functional teams, manage detail, and drive momentum day-to-day, while acting as a senior client partner and trusted advisor.

You'll also play a key role in shaping how we deliver – improving standards, evolving ways of working, and helping establish delivery excellence as a true competitive advantage.

Key Responsibilities

- Own end-to-end delivery of projects and retainers, from discovery through to launch and optimisation.
- Structure sprints and resources around clear scope, priorities, and effective execution.
- Build and manage project plans, timelines, dependencies, and critical paths.
- Lead high-quality launches and ensure smooth go-lives.
- Own commercials including budgets, forecasting, utilisation, and margin.
- Proactively manage risks, blockers, and scope to protect outcomes.
- Act as the primary client lead, driving alignment, confidence, and clear communication.
- Lead cross-functional teams with clear briefs, strong coordination, and continuous improvement.

About You

- 2–3+ years delivering Shopify or e-commerce builds (agency or similar)
- Strong hands-on experience with Shopify setup and ecosystem
- Experience with data migration and tools like Matrixify
- Familiar with tools such as Klaviyo and GA4
- Basic understanding of HTML/CSS (non-development level)
- Comfortable managing multiple projects in a fast-paced environment
- Strong communicator with client-facing experience
- Experience with Shopify Plus (desirable)
- Right to work in the UK

What We Offer

- Hybrid working (UK-based, with travel to Bath for key meetings and events as required).
- Pension (matched up to 3%).
- 23 days holiday + bank holidays.
- Christmas shutdown (3 working days between Boxing Day and New Year).
- Birthday leave.
- 2 mental health days per year.
- Private medical, income protection & life insurance.
- Optional critical illness cover and dental.
- Access to perks and high street discounts via Zhoosh.

How To Apply

If you think you're the person we're looking for, we'd love to hear from you.

Please send your CV and a short supporting note outlining why you'd be a great fit to tom@blubolt.com
