ALEX²

THE REVOLUTION IN
ALLERGY DIAGNOSTICS

ALEX²

TEST NEARLY 300 ALLERGENS

- ALL-IN-ONE ARRAYS
- MEASUREMENT OF tIgE & sIgE
- WIDEST RANGE OF MOLECULAR ALLERGENS
- KIT WITH 20 OR 50 ARRAYS

BENEFITS

- Covers nearly 100% of all globally relevant allergens in one assay run
- Comprehensive picture of patient's sensitisation status
- No time wasted by searching allergen databases
- Individualised therapy options included

KEY FEATURES

ALLERGEN PANEL

- ELISA-based IgE multiplex assay
- 117 extracts & 178 molecular allergens
- 50+ unique molecular allergens
- Total IgE included

CCD-FREE DETECTION

- Non-specific IgE antibodies against cross-reactive carbohydrate determinants (CCDs) are automatically blocked
- High specificity & lower interpretative burden

TECHNOLOGY

- Nano-bead technology
- Choose from 15 predefined allergen panels (based on allergen groups)
- Design your own allergen panel via on-demand multiplex feature

MADx tests are processed and analysed by our proprietary hardware (MAX 45k, MAX 9k, ImageXplorer) and software systems (RAPTOR Server Analysis Software, RAVEN Interpretation Software).
