

70
JAAR

Service life of EPDM of more than 70 years
(SKZ-study)

100 % welded seams using hot air,
100 % bitumen-compatible

Completely UV-resistant and weatherproof

Permanently elastic and flexible at
low temperatures of down to -40 °C

Ultimate elongation of over 500 %,
free from shrinkage

No shattering effect

Slip resistant, even when wet

RESITRIX®

Versatile EPDM waterproofing
solution for flat roofs solution

RANGE OF SINGLE LAYER
WATERPROOFING MEMBRANES FOR
ROOFS, FACADES AND BUILDINGS

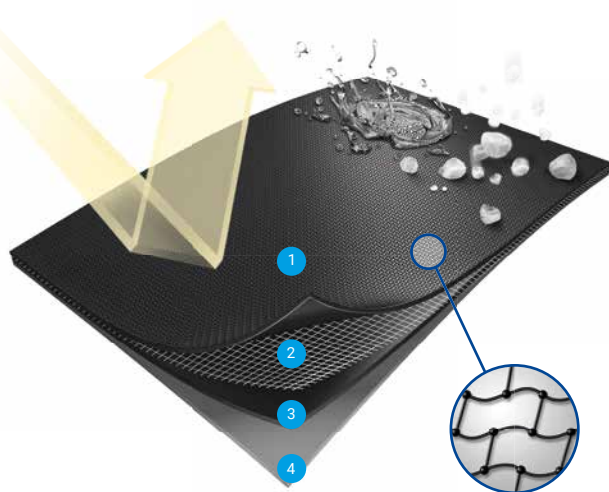

RESITRIX® – reliable single-layer EPDM waterproofing membrane

RESITRIX®, our market leading EPDM, offers you a reliable waterproofing around the building envelope in both refurbishment and new build projects.

The market leading advantages of RESITRIX® lie in the unique combination of materials: the synthetic rubber EPDM and polymer-modified bitumen.

Our extremely flexible, single-layer waterproofing membrane can thus be applied on almost all substrates. The membranes are welded together quickly, easily and safely using a hot-air device without any need for naked flames.

RESITRIX® MEMBRANE STRUCTURE

- 1 EPDM with a textured surface – slip resistant
- 2 Glass fabric reinforcement
- 3 EPDM
- 4 Polymer-modified bitumen

You can also find more information about RESITRIX® at www.ccm-europe.com.

Safe and easy installation without any naked flames

Safe

Welding with a hot-air device without any need for naked flames at temperatures of down to -10 °C.

Uncomplicated

The entire underside of the membrane can be welded and joints and junctions can be freely selected.

Watertight in next to no time

The clearly visible welding bead guarantees durable seam without any need for additional testing equipment.

RESITRIX® training

Become a RESITRIX® Qualified Roofer with an extensive product training offered by the professionals for the professionals at CARLISLE® ACADEMY.

Range of membranes for every flat roof

The RESITRIX® product range provides the right membrane for every flat roof roofing system – including green roof system. RESITRIX® can also be used for refurbs, drainage and roof details. An extensive range of accessories is available to choose from.

RESITRIX®SKW FULL BOND

The full-surface, self-adhesive, root-resistant waterproofing membrane

RESITRIX®CLW

The classic waterproofing membrane for substrate bonding with PU adhesive

RESITRIX®SK PARTIAL BOND

The partially self-adhesive waterproofing membrane

RESITRIX®MB

The EPDM waterproofing membrane designed specifically for mechanical fixation
