THE BEST.**

RADON BIKES 2017

RADON 2017

WE MIGHT NOT BE ABLE TO CHANGE THE WIND, BUT WE CAN SET THE SAILS!

We at Radon believe in innovation, taking unusual approaches and coming up with off-the-wall ideas. But we never forget the founding principle that has made us who we are today: one of the largest direct dispatch companies in Europe, and still with the mission we had 25 years ago – „lots of bikes at the lowest possible prices!“.

How can we do justice to this principle year after year without falling short of our ambitions? We stay true to our values, presenting exciting innovations every year and expanding our involvement in professional racing. The 2017 mountain bike racing season will represent a turning point in the history of our brand at RADON BIKES. With two works teams, we'll be making a positive contribution to the UCI cross country and downhill world cups.

For Christopher Stahl, CEO of H&S Bike-Discount GmbH and founder of RADON, increasing our involvement in professional sport with our own works teams is a logical next step. "With RADON BIKES we've been at the very top of the rankings of bike magazine product tests for years. It's therefore only natural to be involved in professional sport. The best bikes have to be ridden, tested and further developed by the best athletes. As an active motor sports enthusiast, I know that if

I'm to improve my product in even the smallest detail, I need to meet the challenges presented at the professional level and to get feedback from the drivers. This applies not only to racing bikes, but also to the E-MTB category that's so important at the moment. Moreover, professional sport is the perfect stage for RADON to gain international recognition."

In addition to the fast developing sports market, the future presents RADON with a new challenge: E-bikes are also capturing the sports market segment with innovations springing up like mushrooms. So we want to be involved! As well as the highly successful ZR RACE HYBRID, which has shone in numerous tests, a motorised variant of the Slide will be introduced for the 2017 season. It will be the perfect addition to our range of full suspension bikes. Balanced kinematics, Bosch CX Performance drivetrain and tried and tested transmission and suspension technology will get riders grinning and make the SLIDE HYBRID the star of our test events.

We're looking forward to the 2017 season with you!

3 WAYS TO GET A RADON

ORDER AT OUR ONLINE SHOP

www.bike-discount.de

Find, order and purchase your dream bike at our online shop.

The bike is assembled, set-up and and packaged ready for delivery.

The bike is assembled, set-up and and packaged ready for delivery.

Then simply unpack your bike and assemble it in a few simple steps.

Have fun with your new RADON bike.

Radon Bikes Hotline: +49 2225 / 8888-222
Monday to Friday 8 am - 6 pm,
Saturday 9 am - 1 pm

MORE THAN JUST ONLINE SHOPPING

As a bike manufacturer, we offer bikes of real quality with first-class features at top conditions. But since many people want face-to-face advice when they purchase a bike, and want somewhere to take it for repair and all the maintenance tasks, we have created the Radon service partner programme. The concept is unique: local bike dealers and repair shops gain from the programme as do the consumers.

The first service of your Radon bike is also available at the service partner for a fixed price - depending on the type of bike, it's €30 (racing bikes), €35 (hardtails) or €40 (full suspension and trekking bikes), as long as the service is booked within four weeks of the receipt of the bike, and the bike does not show more than 300km of use. Currently there are over 260 service partners throughout Europe, with more joining the programme all the time.

More information at:
www.radon-bikes.com

SIZE
SPLIT

YOU CHOOSE YOUR SIZE...

For the 2017 range, we have introduced our new Size Split concept, currently available for three model series. For 27.5" models, we intentionally do without the largest frame height (22"), and for the 29" models, the smallest (16"). Size Split scaling means we guarantee best possible performance by perfectly harmonizing body size and leg length with wheel size.

Another plus: we offer the „medium“ frame height (18"/20") in both wheel sizes. Do you want a nimble and agile bike? Or perhaps you'd prefer the best possible touring performance? **With Size Split, the choice is yours!**

XC
FACTORY RACING

RADON CROSS COUNTRY FACTORY RACING

The 2017 Mountain Bike racing season will go down as a landmark season in the history of the RADON brand. Having established two teams made up of the best riders, the brand from Bonn is not only going to have a much stronger presence in the international racing world, but is also aiming straight for podium places in the UCI World Cup, as well as in national and international championships.

For the RADON FACTORY CROSS COUNTRY TEAM, who competed in the Olympics, the stated long-term goal is success at the Tokyo 2020 games. RADON has chosen experienced manager Ralph Näf to lead the RADON FACTORY CROSS COUNTRY TEAM. The three-times world champion from Switzerland, who was still competing successfully in international races himself up until 2013, has assembled a promising team. With the XC Junior World Champion 2013 Alessandra Keller (SUI - 20), 2014 XCE World Champion Kathrin Stirnemann (SUI - 28) and XC Junior and U23 World Champion 2006/2010 Mathias Flückiger (SUI - 28), the team is made up entirely of world champions.

The Cross Country Team will mainly compete on the new RADON JEALOUS. This new Carbon hardtail was already receiving laurels before its sales launch, picking up a top ten place in the World Cup and a „super“ rating in a test by Bike Magazin (01/2016).

RADON

DH
FACTORY RACING

RADON DOWNHILL FACTORY RACING

The RADON FACTORY DOWNHILL TEAM also has its share of world champions. Under the leadership of four-times world champion Joost Wichman, 2014 Downhill World Champion Manon Carpenter (UK - 22), current City DH World Champion Johannes Fischbach (GER - 28), and Faustin Figaret (FRA - 22) will be competing for the best times in the World Cup. Raphaela Richter, who came out of the 2016 season as Enduro World Champion (U21) will strengthen the team on occasions.

The downhill riders have gone for the RADON SWOOP 200, which was already the chosen ride of Johannes Fischbach and Faustin Figaret in the past year. This chassis has also proven its potential in competition and in numerous tests.

THE NEXT LEVEL, CARBON FULLBLOOD RACER

How light were we able to make our new JEALOUS using the finest lightweight parts whilst demanding no drop in performance?

The result: a potentially record-worthy 7.35kg with an 18-inch frame! On the bike you'll find competition-tested parts from TUNE, light Thunder Burt tyres and high-end suspension from Fox – naturally from the Factory series and with Kashima coating.

The whole featherweight package is rounded off with AX LIGHTNESS rims with a set weight of 1240 grams.

JEALOUS? JEALOUS!

FRAMECONCEPT

A 1,880g frame (excluding damper) and race-tested geometry turn our SLIDE CARBON 140 into a rocket. The RADON Conehead, PressFit bottom bracket and QR15/X12 thru axles at the fork and rear section make the bike as light as it is rigid. With its distinctively shaped frame and clean internally routed cables, the trail bike has plenty to offer visually. The frames on all four models are ready for integrating adjustable seat posts and retrofitting side swing derailleurs.

FLIP CHIP – CHOOSE YOUR MEAL!

„Choose your Meal“, „The Choice is Yours“ or „All-Singing, All-Dancing“ - we spent a long time debating what to call our new Flip Chip concept. Its special feature: you can quickly switch your SWOOP 170 from high-end tourer to trail or downhill mode. For each configuration, the head tube and seat angles change by 0.5° and the BB drop by around 6mm.

Whether on a tour, a trail or in the park: with the FLIP-CHIP technology, you can instantly change the SWOOP's geometry to satisfy any craving.

FRAMECONCEPT

The SAGE CARBON's frame is based on the high expectations of tourers and racers: top performance, low weight and high comfort levels. The state-of-the-art Twin Mold process and optimally shaped, oversized carbon tubes of the frame's main section and chain stays, means the frame achieves the highest levels of rigidity. This means top sprinting performance and energy transfer. The slender seat stays and a flat top tube offer exceptional vertical damping. The monocoque design is highly effective in reducing frame weight.
