## Radon Bikes: Full speed ahead!

In 2016, Radon enters its 22nd season. What started out as a niche product with a couple of cross-country bikes, has grown over the years into a mature bicycle brand, which has built an excellent reputation across various segments.

Radon no longer limits itself to only mountain bikes as it did during its beginnings, the online retailer today offers a wide array of different product lines featuring road and cyclo-cross bicycles, touring bikes and, as the newest addition to the line-up, electric bicycles. "We are now reaching all types of cyclists", says Radon CEO Christopher Stahl. The strong growth during the last few years has given the company the opportunity to engage in projects that were unthinkable before. The development of a carbon fibre Enduro frame is one of the great results of these endeavours. The frame was highly praised in tech reviews and publications all around and received excellent feedback from its customers! However, even in the higher priced segment of carbon fibre Enduros, the basic Radon philosophy remains unchanged: "A lot of bike for your money!"

Enduro, gravity, cross-country: Radon does not only continue to consistently develop and improve its bicycles further and further, but also used 2015

to expand its involvement in the professional racing scene. Four teams, the Radon/Magura Factory Downhill Team, the Radon Factory National DH Team, the Radon Factory Enduro Team, and the Radon/EBE-Racing Team have had an exceptional and outstanding year. It has actually been the most successful season in Radon's history as a sponsor of professional cycling. Working hand-in-hand with the pro riders gives Radon the valuable opportunity to use their experiences and inside knowledge for the development and design of the new bikes. Team riders are testing prototypes before they turn into final products and constantly provide innovative ideas for the bikes of tomorrow.

A joyful Christopher Stahl states: „All this shows that we were able to complete the mission that we set out for 22 years ago: To offer premium bikes at affordable prices!“ But Radon has really already gone way beyond offering quality bicycles at decent prices. Radon now stands for innovative solutions and premium bikes, which are valued by professional riders and hobby cyclist alike. A Radon bike has what it takes to be your favourite bike.

# PREVIEW

## **Skeen 120**

Our Skeen has also been completely redesigned for 2016: Equipped with 120 mm of travel and light 27.5"-wheels, the bike is an excellent all-rounder! Its frame is forged from 7005 aluminium alloy and features the Radon Conehead for tapered forks and internally routed cables that give it a clean look. Other technical features are: Side-Swing Derailleur mount, PressFit bottom bracket, and PM brake mounts. The wheels use a QR15 axle in the front and an X12 axle in the back, and the link is made of carbon fibre. The frame's weight will approximately be around 2480 grams, not including the rear shocks. The Skeen will be available in 4 versions starting at 1.429 €\*, and all models will allow for an adjustable seatpost. The new 2016 Skeen is an excellent bike based on an aluminium alloy frame. It's the perfect companion with excellent all-rounder qualities, ready for endless trails and enduring marathon adventures.

## **Slide 140 Carbon**

The new Slide 140 is completely made off carbon fibre. The frame, rear triangle and link are extremely light while providing excellent stiffness and high comfort. Its weight is a mere 1880 grams (not including rear shocks). This set-up makes for a highly efficient chassis with 140mm travel placed on 27.5" - wheels that holds enough reserves for challenging descents. The Slide 140 Carbon also includes technical features like the Radon Conehead, Shimano PressFit bottom bracket, internally routed cables, Low Direct

Mount front Derailleur and QR15/X12 through axles front and back. It will be available in 4 different versions starting at 2.679 €\*; all models can later be equipped with an adjustable seatpost and a Side-Swing front Derailleur. The Slide 140 Carbon combines efficient climbing capabilities with excellent downhill performance translating into unchallenged All-Mountain fun!

## **Swoop 170**

Also intended for 2016, the Swoop 170 is a completely new designed Super-Enduro based on an aluminium alloy frame packed with a series of technical features. Its new FlipChip-Technology enables the rider to adjust the geometry of the bike to three different modes, making for a very efficient the set-up of the chassis. The bike also comes with the new, wider boost standard, adding agility and improving bike handling even further. Well-proven features of the Swoop 170 are the Radon Conehead, Shimano PressFit bottom bracket, internally routed cables, Low Direct Mount front Derailleur, and 27.5"-wheels with QR15/X12 through axles. All models can be equipped with an adjustable seatpost and a Side-Swing front Derailleur. The Swoop 170 will come in 4 versions, starting at 1.679 €\*. With 170mm of travel front and back, this bike shows its strengths when the trail points downhill and turns any outing at the bike park into a gravity fest. However, it still does maintain great uphill performance. The Swoop 170 is a pure-bread Super-Enduro, maximizing versatility and ready for any terrain.

# 3 WAYS TO GET YOUR RADON

## BIKE-ORDER IN THE ONLINE SHOP

[www.bike-discount.de](http://www.bike-discount.de) Select, order and pay for your bike of choice in our online shop.

The bike is assembled, adjusted and then prepared and packaged for shipping.

A parcel courier collects the bike and delivers it to your home.

There you merely need to unpack it and assemble it in a few quick steps.

Enjoy your new **RADON** bike.

Radon Bikes Hotline: 02225 / 88 88 -222

Monday to Friday: 8.00 – 18.00

Saturday: 9.00 – 13.00
