The Everything Platform for Your Family Law Practice

LEAP Family Law occupies a unique position in the legal software market, providing specialist software for family law practitioners.

It offers everything you need to manage your client's matters efficiently – including AI solutions, case and document management, matter-based legal accounting, document assembly, and legal publishing assets in one integrated cloud solution.

LEAP Family Law uses DivorceMate's Forms, Calculations and Agreements, embedded directly in LEAP (these DivorceMate products within LEAP Family Law are referred to as DivorceMate in LEAP).

From the moment a matter is opened, the features and functionality of DivorceMate are joined with the power of LEAP. Eliminate the need for two separate software platforms, and access everything you need to run your family law practice all in one place by using LEAP Family Law.

Powered By DivorceMate

The team at DivorceMate has been proudly serving the Canadian family law bar for almost four decades, and that deep bench of expertise has taken over LEAP Family Law's innovation, content, development and support. LEAP Family Law will continue to feature DivorceMate's Forms, Agreements and Calculations that clients have trusted and relied on for 38 years.

DivorceMate Calculations: Determine child and spousal support for all situations no matter how complex, including different types of income, section 7 special expenses, summer scenarios, adult children, and more.

DivorceMate Forms: Create professional looking court forms, including financial forms with built-in mathematical calculations, quickly and efficiently. Forms are created in Microsoft Word to take advantage of all Word functions and capabilities.

DivorceMate Agreements: Draft domestic contracts and agreements, using hundreds of region-specific clauses with legal commentary. Agreements include Separation Agreements, Marriage Contracts/Agreements, Mediation Reports, Parenting Plans and more.

WHO WE ARE

LEAP Canada

LEAP is one of the world's fastest growing legal software companies and a global leader in legal technology. With a dedicated Canadian division, our Canadian offices in Toronto and Vancouver ensure that all aspects of our service—from sales and support to training and development—are managed locally by Canadian professionals.

At LEAP Canada, we are dedicated to empowering Canadian law firms with innovative, secure, and locally supported technology solutions, ensuring that our clients receive the highest level of service and support.

DivorceMate has been the most trusted family law software brand in Canada, used by family law professionals and the judiciary since 1987. Now thanks to the robust collaboration between LEAP Canada and DivorceMate, LEAP Family Law eliminates the need for family law firms to have separate platforms for practice management and legal software further driving their efficiency, improving productivity, and future proofing their business.

LEAP's mobile features provide so much efficiency that I have more time to focus on client service. The LEAP transition was effortless and the training and support we have received exceeded our expectations. LEAP Legal Software is a smart choice for our firm.

Thomas MacKay, Partner
Fox McNevin MacKay LLP

Switching from PCLaw to LEAP has enabled our firm to work more efficiently by utilizing the robust Practice management elements and accounting functionality within one software package. Having everything in one place has led to better execution by our team, and improved overall service to our clients.

INNOVATION IS AT THE HEART OF WHAT WE DO

LEAP's AI Technology

At LEAP Family Law we are always striving to provide the best practice management software in the world — with new products, user feature requests and integrations with cutting-edge AI technology that puts LEAP Family Law in a class of its own.

LawY

LawY is your legal research assistant, able to answer legal questions, research and summarize caselaw and legislation. LawY can also draft letters, documents, and agreements. Starting a new file? Ask LawY what legal issues and risks to consider. Drafting a factum? Ask LawY for the relevant caselaw. For added confidence, legal research questions can be verified by qualified Canadian family lawyers.

Matter AI

Matter AI can instantly analyze documents in your matter, including correspondence, email, PDFs, legal documents, financial disclosure, and even handwritten notes. Matter AI can answer questions, identify key issues, generate concise summaries, and draft professional correspondence and legal documents. Need to pull up past meeting notes or draft a disclosure letter? Matter AI can help.

AI Prompts

Create comprehensive family law motion, applications, affidavits and other court documents using LEAP's pre-drafted AI Prompts. Select an affidavit prompt for decision-making responsibility, parenting time, child and spousal support, section 7 expenses, noting a party in default, and more! Interact with the AI to refine and customize the draft to your specific needs.

Auto Time

Timekeeping software automatically logs billable hours without the need to manually input time entries. Simplifies billing and provides insight into productivity while syncing with the LEAP timesheet.

LEAP Family Law – What is Included

DivorceMate in LEAP

LEAP Family Law uses DivorceMate's Forms, Calculations and Agreements, embedded directly in LEAP.

Automated Forms Library

Easily access almost 400 current, province-specific court forms. LEAP Family Law's library of forms are pre-configured helping you stay compliant and save time.

Document & Email Management

Create, store, share and search for documents, emails and forms in one secure location from within your LEAP Family Law matters, automatically synced across your devices.

Updates in Real Time

Any time you or someone in your firm works on a document or creates a new one, the matter updates in real time, improving collaboration and workflow within your firm.

Office & Trust Reporting

Reporting features allow you to measure your law firm's performance and generate a wide range of customized reports for clients, trusts, office and management metrics.

Automated Document Production

Once you have entered matter details, LEAP's automated merge fields will apply the repetitive data when generating new documents, so you won't waste your time.

LEAP Mobile App

LEAP Family Law can be accessed on your tablet or smartphone so you can communicate with clients, view files and manage matters on-the-go.

Online Document Sharing

Securely share and collaborate on documents with clients and third parties in real time. You can comment, reply, grant or revoke access to documents at anytime.

Microsoft 365 Integration

LEAP Family Law integrates with familiar programs such as Word, Excel and Outlook.

Legal Accounting & Billing

Track billables, manage client trusts and office accounts, create invoices and send to clients for online payment, capture disbursements and integrate LEAP accounting with Quickbooks and Xero.

COMPANION PRODUCTS AND PARTNERSHIPS

Cutting Edge Innovation

LEAP features dozens of companion products to give you everything you need to run an efficient law firm.

Easy-to-use court book production with automatic document consolidation and index generation.

Share and collaborate on documents securely with clients online.

Get paid faster with secure, in-platform credit card processing.

Auto-calculate deadlines and court dates—synced to your calendar.

Gain powerful performance metrics, enhance decision-making, and optimize your legal practice.

File, serve, and search—directly from your LEAP matter.

SOC 2 Compliance

LEAP is a serverless software solution that securely stores your client and matter information within the cloud, enabling your firm to run with unrivalled efficiency.

DivorceMate and LEAP University

With a LEAP Family Law subscription you will have access to both LEAP University and DivorceMate University. These two platforms offer dozens of training webinars that will enhance your use of our platforms. Webinars are eligible for CPD hours with law societies across Canada.

LEAP University offers dozens of included courses such as:

- Essential skills of using LEAP Family Law, AI backed legal practice and matter managements system
- Using LEAP to increase efficiency in document and matter management
- Financial aspects of LEAP including time, accounting and reports
- Customization and Automation of documents and workflow

DivorceMate University offers:

- Product training to get you started
- Advanced substantive training on numerous family law topics, delivered through an evolving series of on-demand webinars
- Useful articles and papers
- Short “how to” videos on several topics/FAQs
