Suitable for	-	Blend partner for blown film extrusion, injection moulding, extrusion, blow moulding	Injection moulding (Consumer goods, boxes, technical parts etc.)			

 $<sup>^{</sup>a}$  The allocation factor is the percentage of biomass allocated to the product. It refers to the organic content (e.g. polymers) in the product.  $^{b}$  ISO 527-1/-2  $^{c}$  ISO 179-1/1eA  $^{d}$  MFR (230°C/2.16 kg)

The information given here is only valid for M·CYCLOSE® grades in their original packaging, sold by BIO-FED® and/or its authorized partners. If M·CYCLOSE® grades are mixed in any capacity with foreign material, beside masterbatches recommended by BIO-FED®, BIO-FED® declines any further responsibility. M·CYCLOSE® grades shall be stored in dry, closed rooms in closed packaging in original state. For keeping the product properties, the material must be protected against direct sun and the temperature must not exceed 50 °C at any time during transport and storage. M·CYCLOSE® grades have a remaining shelf life of twelve (12) months at room temperature (23 °C) from the delivery date. We recommend that products made of M·CYCLOSE® grades shall be stored under same conditions. All M·CYCLOSE® products listed here can be colored with AF-Color® and AF-Carbon® masterbatches from AF-COLOR. Furthermore AF-Complex® additive masterbatches are available. Please note that the use of masterbatches might influence the mechanical and/or optical properties of the final part.
